COVER PLATE THAT CAN BE PAINTED

BEFORE PAINTING THE MATT WHITE - AW COVER PLATE

AFTER PAINTING THE COVER PLATE

SUGGESTIONS FOR USE.

The MATT WHITE cover plate can also be painted.

PAINTING
The matt white paint of the cover plates - AW - can be used as a primer.
Before painting with house paint, the surface should be sanded/matted for better adhesion.
Resin-rich products (e.g. water-based varnishes) should be used.

Notes
- Do not paint the devices (keys, sockets, etc.)
- Paint the cover plate separately and mount it when it is dry

CLEANING THE COVER PLATE
Water-based detergents should be used.
Using ethyl alcohol or other solvents which could damage or soften the paint is not recommended.
