Light up Your world. Now

Merging timeless minimalist design with cutting-edge smart technologies, Light Now redefines your home management experience.

Compatible with both traditional installation systems and the latest smart home solutions, Light Now is also an eco-friendly range that prioritizes sustainability by minimizing energy use and utilizing green and recycled materials to reduce the ecological footprint.

Step into the next era of the smart home: reduce impact and live smarter.

LIGHTnow

Design

Extreme minimalism. Timeless beauty. Accessible premium

Every detail is at the centre of a minimalist, pure design.

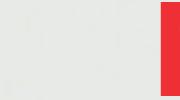

Perfect alignment between the cover plate and axial switches

Slightly rounded edges

Brand engraved on the edge

The floating frame ensures perfect adhesion to the wall

DESIGN
AWARD
2024

Lightnow has won this prestigious international award, confirming Bticino's ability to combine technology and design.

Light The distinctive element

Central LED

A discreet central LED, illuminated in white or blue, is positioned at the end of the soft signature line. This design makes the control more ergonomic, facilitating its identification.

Lighting frame

This accessory enhances comfort and automation, making it an interesting and flexible novelty for a variety of uses.

Finishes

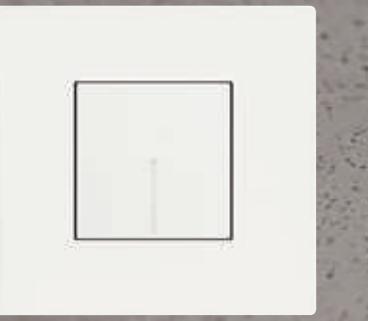

A careful selection

Less is more

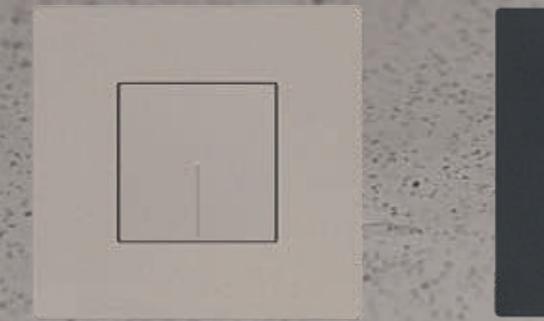

Light Now is available in nine elegantly monochromatic or tone-on-tone finishes, divided into three collections that reflect the latest interior design trends. This approach avoids unnecessary environmental impact from unwanted or superfluous finishes.

A touch of style

Light Now enhances the material component with surfaces that range from matt to grain, creating sophisticated textures. The new surface design offers a unique tactile experience and allows for meticulously detailed material combinations, enabling you to select the finish that best suits your decor and personal taste.

Circular Collection

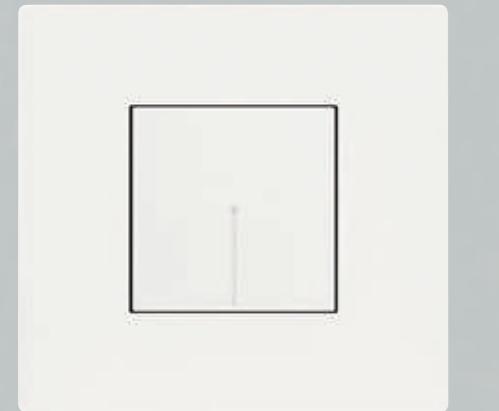

LIGHTnow

11

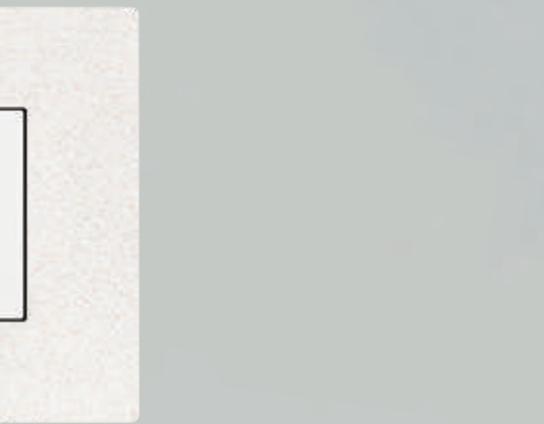

Circular

A story about reuse

The Circular collection of Light Now represents the result of the conscious transformation of pure and completely natural materials, such as viscose and mica.

WHITE

WHITE FIBER

WHITE MICA

This innovation aims at reducing the use of virgin materials, seamlessly integrating into circular economy practices.

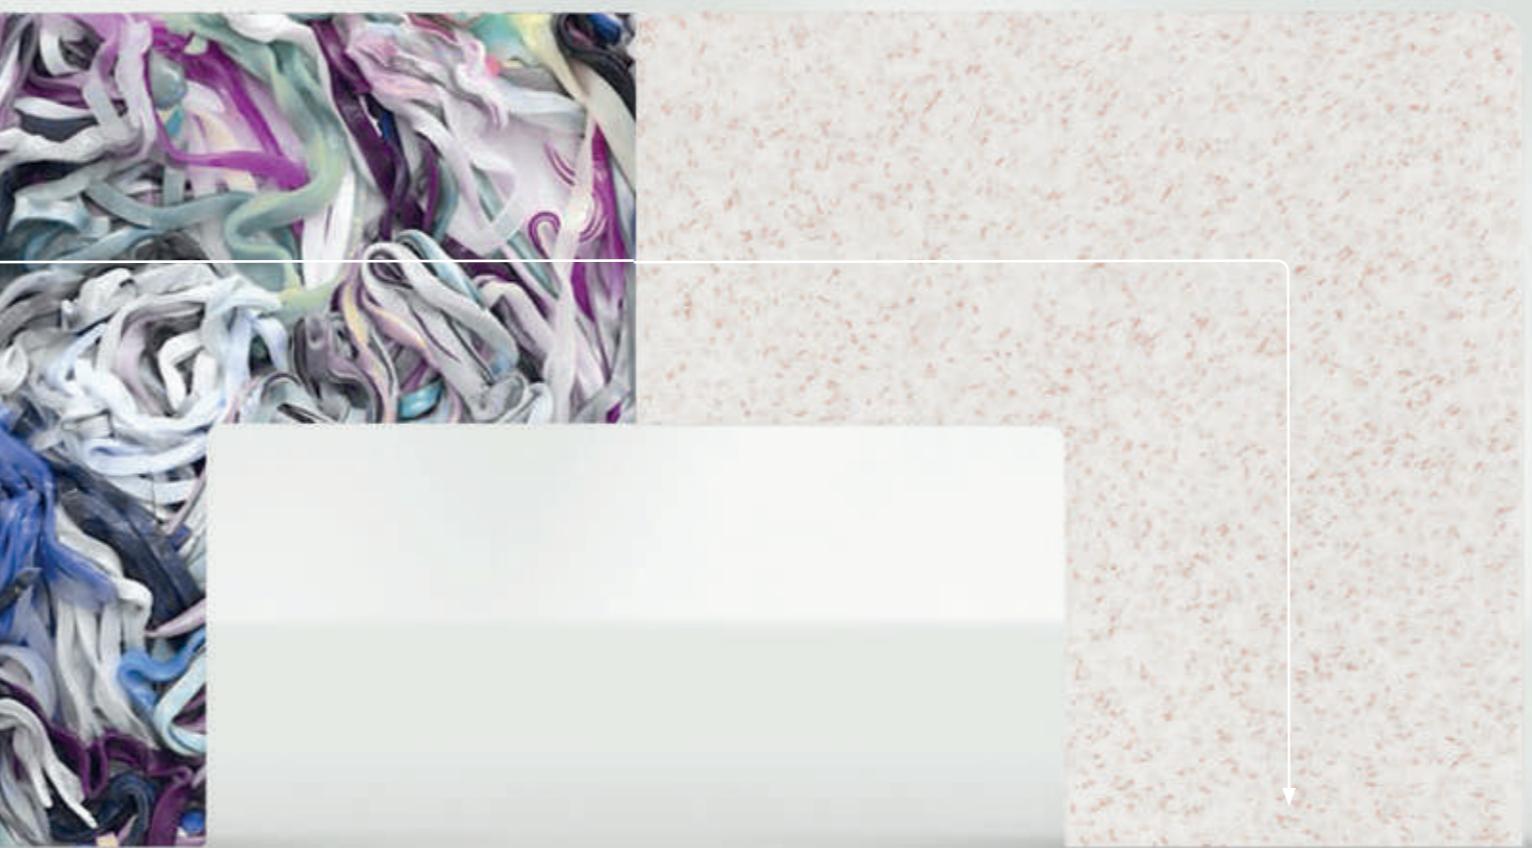

Available in three chromatic variants: pure white with a matte finish, a must-have that is always appreciated and modern, and two exclusive finishes that give surfaces an elegant texture on a smooth surface.

White Fiber

Giving a second life to viscose

Light Now combines viscose fibers with recycled ABS, creating a compound that offers an intriguing result. This fusion of materials demonstrates that it is possible to achieve an elegant aesthetic without sacrificing environmental ethics.

35% VISCOSE

65% RECYCLED-ABS

The fast fashion industry generates a high quantity of textile waste, contributing to environmental pollution. We have transformed these scraps into a sustainable resource capable of promoting a circular economy.

White Mica

From waste to sustainable resource

Light Now integrates mica powder from construction waste with recycled polymers, obtaining materials with improved technical and visual properties that combine lightness and strength. This approach not only enhances construction waste but also provides tangible benefits in terms of durability and aesthetics.

37% MICA

63% RECYCLED-ABS

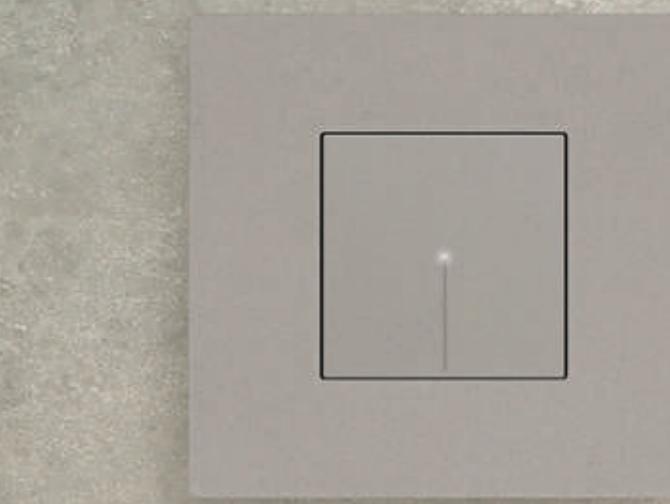

The mica, a naturally occurring mineral, is distinguished by its peculiar properties of brightness and resistance. Recently, a new frontier has opened up with the use of mica derived from construction waste, transforming these scraps into a valuable and sustainable resource.

Stone Collection

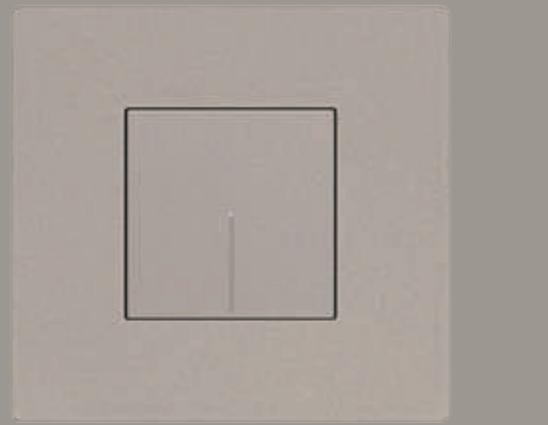

LIGHTnow

10

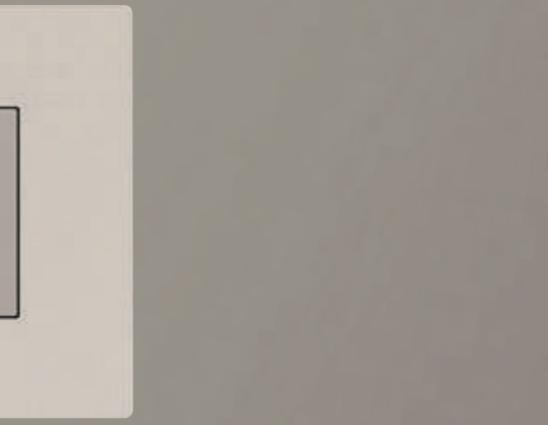

Stone

Inspired by nature

This collection draws inspiration from natural elements such as sand and construction materials, appreciated for their texture and granularity. The uniquely smooth effect is intriguing to the eye and appealing to the touch.

STONE

MOKA STONE

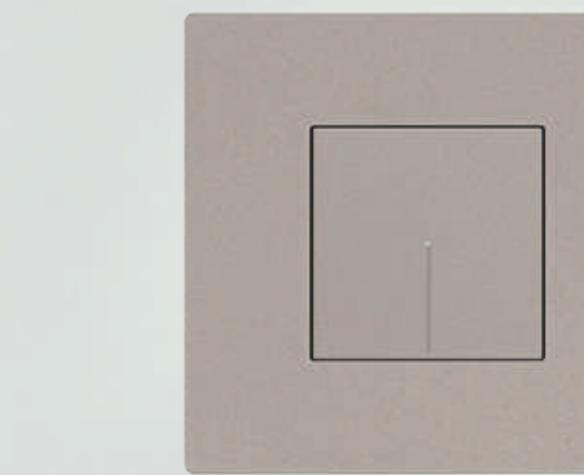

Stone

An innovative, sustainable paint

Light Now features a plate made from recycled ABS, treated with an innovative water-based paint formulated with organic raw materials derived from biomass fermentation, reducing dependence on conventional chemical products.

The use of biomass-formulated paints is essential for reducing environmental impact, promoting an industry that is more attentive to renewable resources, in line with the principles of the circular economy.

Patina Collection

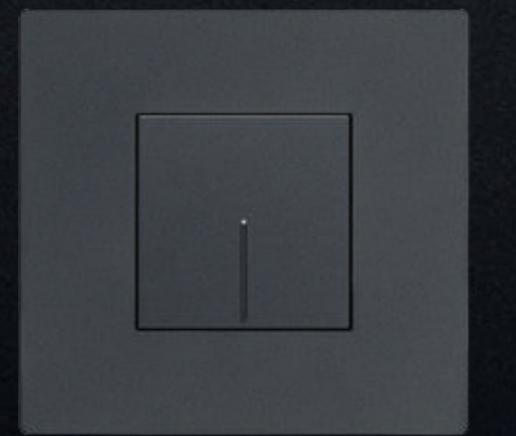

LIGHTnow

25

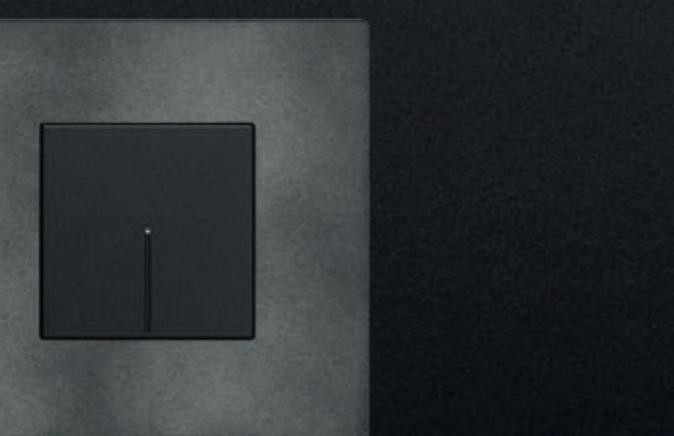

Patina

The value of imperfection

The Patina collection stands out for its deliberately "imperfect" appearance, which celebrates natural beauty and non-uniformity on a recycled polymer.

Green Vision

Our commitment to the environment

The entire Light Now project, in continuity with BTicino values, is based on a sustainable approach which concerns procedures, technologies, environmental impact of the product, materials and packaging.

50% recycled and certified material

Light Now uses 50% recycled materials for coverplates and supports from mechanical and chemical recycling.

Plastic free

All Light Now product packaging is entirely plastic-free. Additionally, we have optimized weight and volume to the fullest extent possible, significantly minimizing the carbon footprint.

Embracing a sustainable future

Light Now's focus on sustainability reflects BTicino's commitment to a better future. Light Now's dedication to sustainability exemplifies BTicino's commitment to a better future.

By harnessing solar energy and optimizing all production cycles and processes, BTicino consistently reduces the weight of all product components without compromising quality.

This approach underscores our unwavering commitment to eco-sustainability, as the actions we take today shape the world of tomorrow. This is an example of the group's commitment to eco-sustainability, because tomorrow depends on what we do today.

LIGHT NOW

Interface
A single design
for multiple
technologies

BTICINO.COM

bticino

Light Now guarantees a high-level design accompanied by a wide range of technologies, ranging from solutions for traditional installations to complete solutions for Smart Homes, home automation MyHome, and the KNX protocol for advanced control of installations. These technologies can be seamlessly integrated, providing your customers with maximum flexibility in home management.

Light Now

Connected controls for the smart home, which communicate via radio.

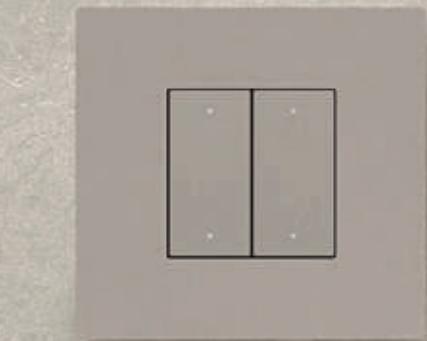

Light Now with Netatmo

Connected controls for the smart home, which communicate via radio.

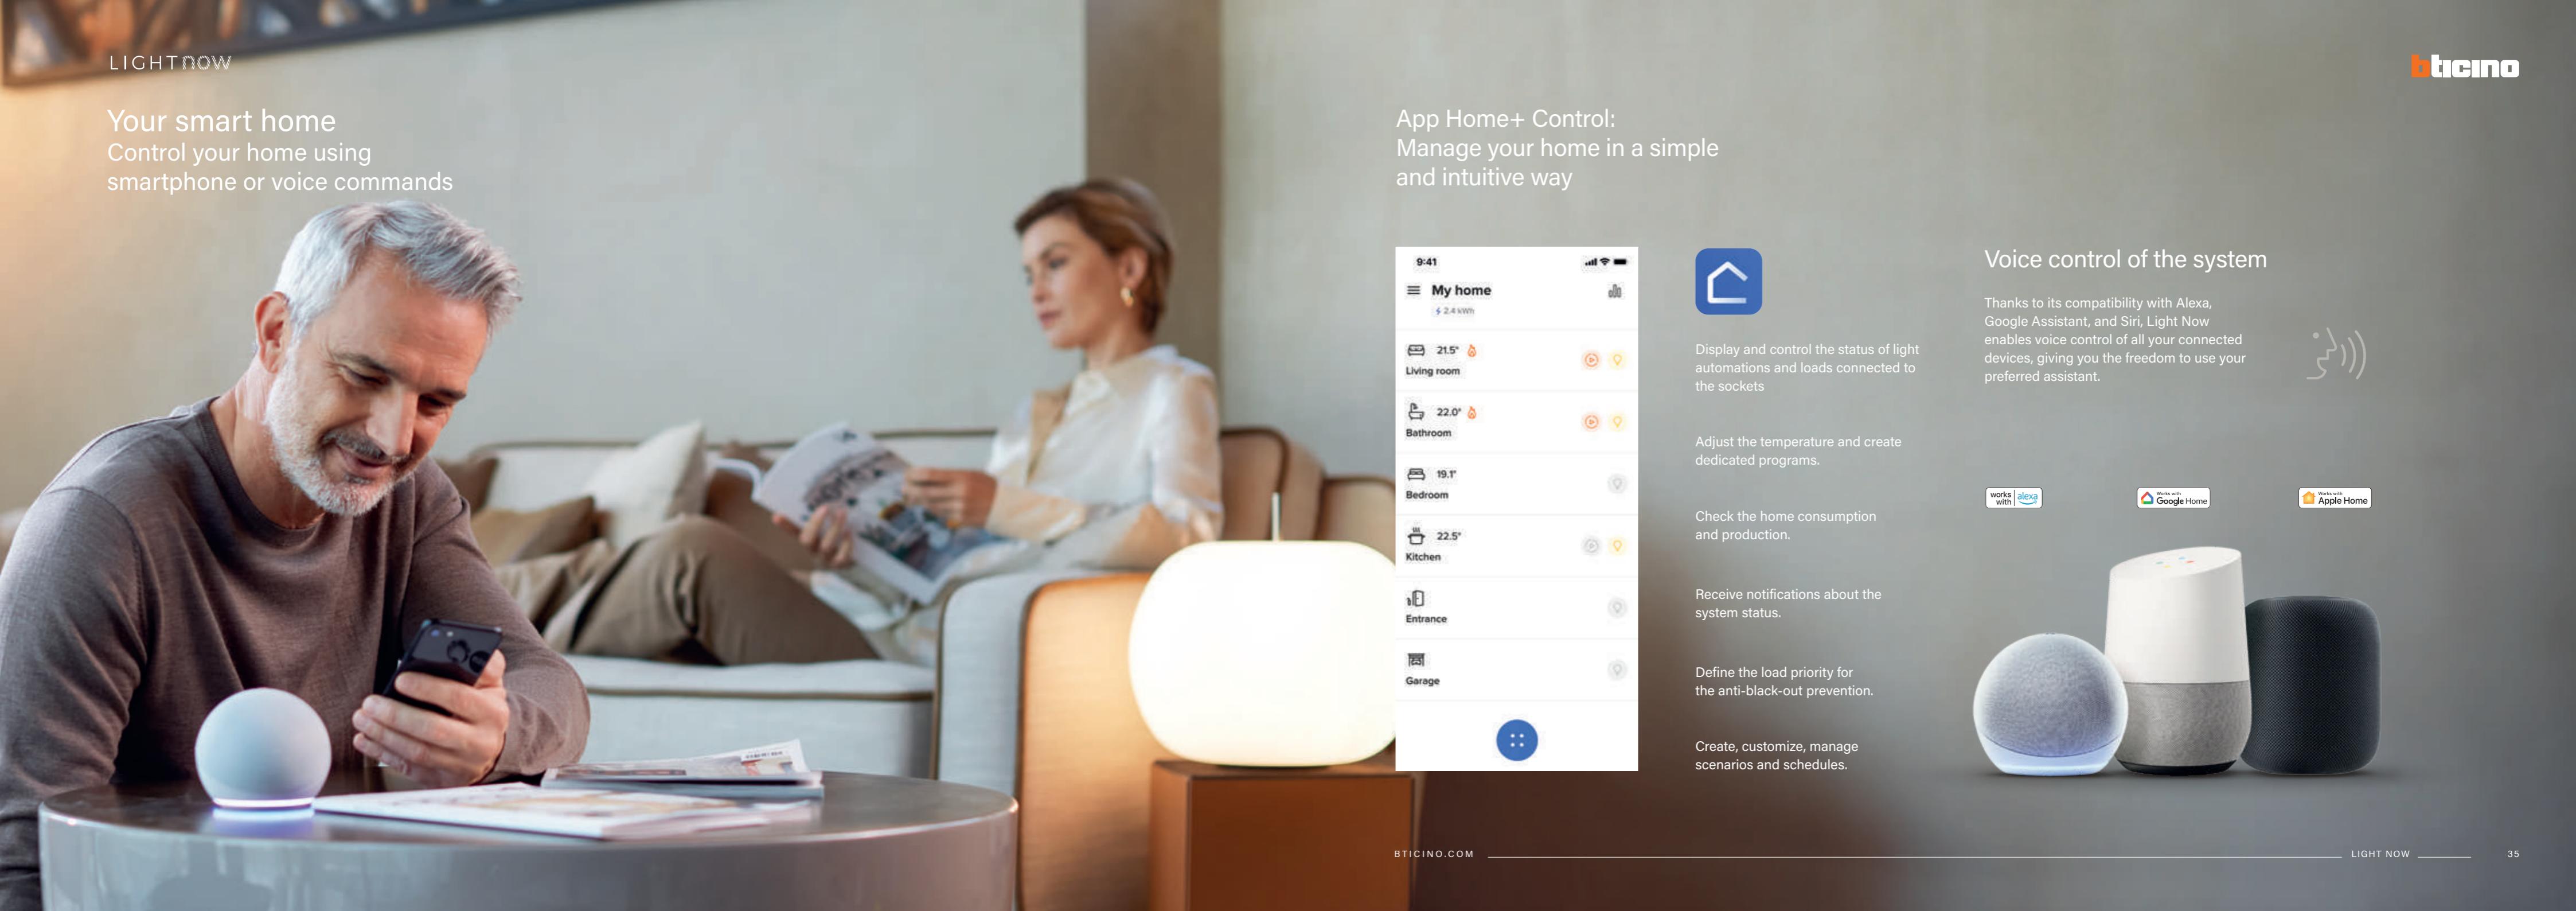

Light Now KNX

Connected controls for the smart home, which communicate via KNX standard bus.

Your smart home
Control your home using
smartphone or voice commands

bticino

App Home+ Control:
Manage your home in a simple
and intuitive way

Display and control the status of light
automations and loads connected to
the sockets

Adjust the temperature and create
dedicated programs.

Check the home consumption
and production.

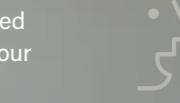

Receive notifications about the
system status.

Define the load priority for
the anti-black-out prevention.

Create, customize, manage
scenarios and schedules.

Voice control of the system

Thanks to its compatibility with Alexa,
Google Assistant, and Siri, Light Now
enables voice control of all your connected
devices, giving you the freedom to use your
preferred assistant.

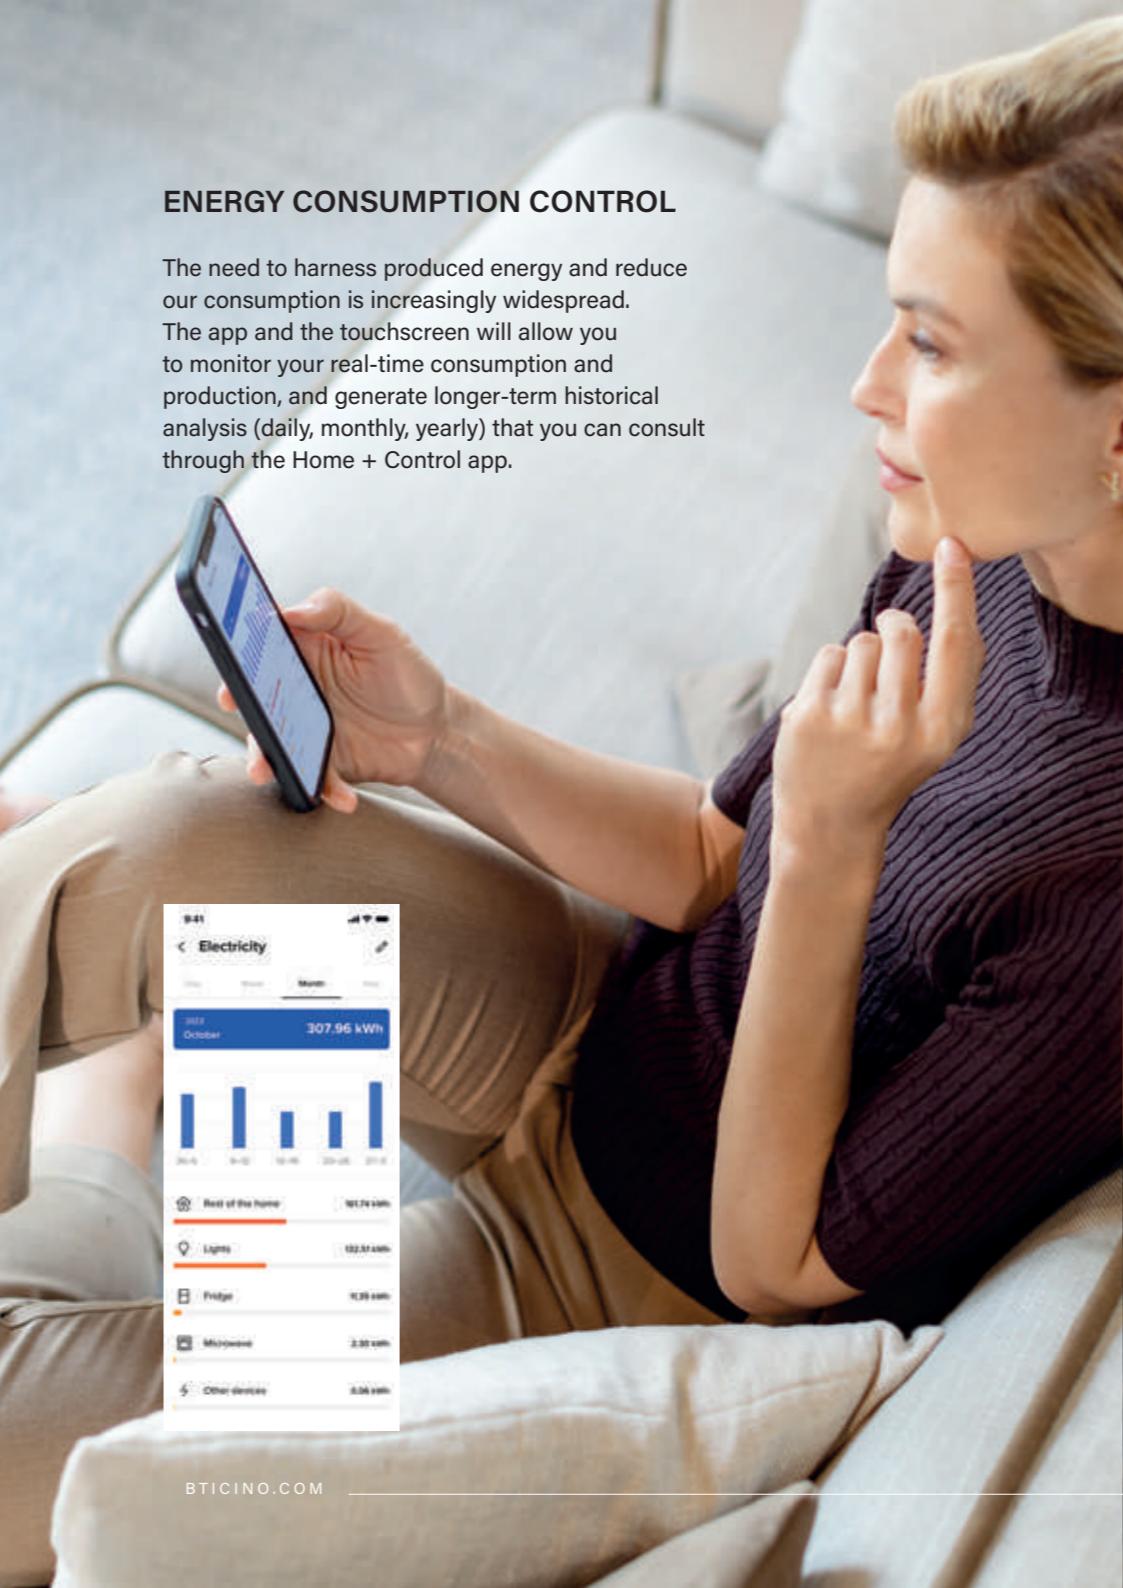

LIGHTnow

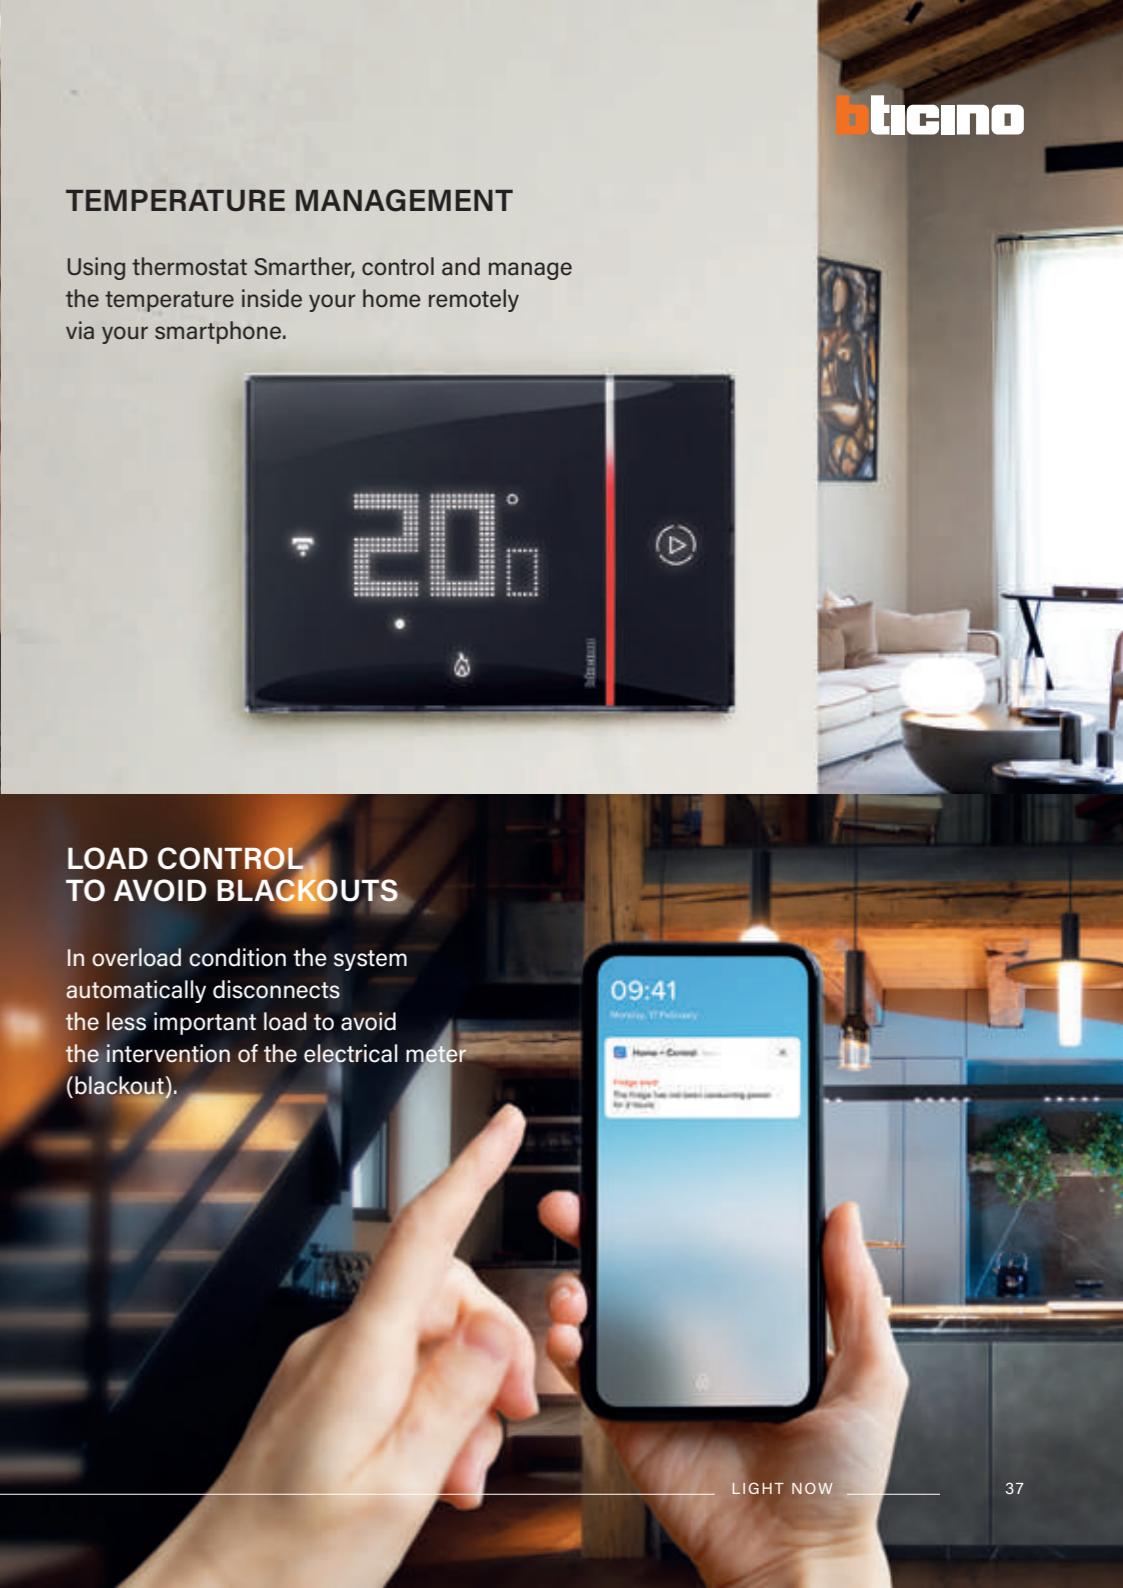

Energy Efficiency

Optimize consumption by monitoring in real-time

ENERGY CONSUMPTION CONTROL

The need to harness produced energy and reduce our consumption is increasingly widespread. The app and the touchscreen will allow you to monitor your real-time consumption and production, and generate longer-term historical analysis (daily, monthly, yearly) that you can consult through the Home + Control app.

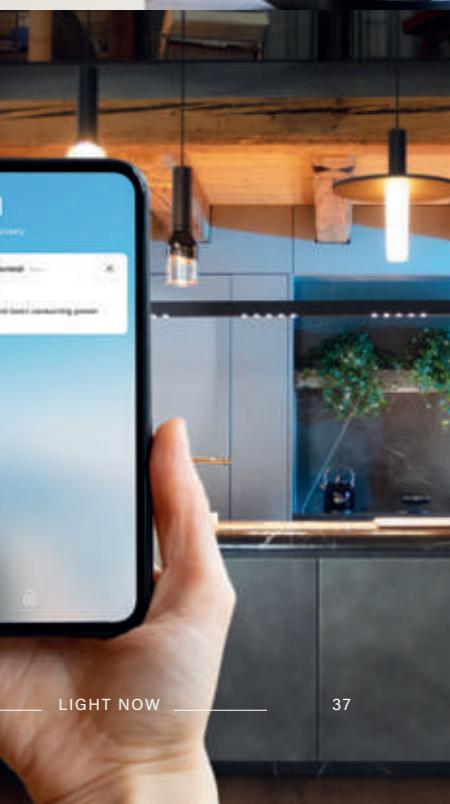

TEMPERATURE MANAGEMENT

Using thermostat Smarter, control and manage the temperature inside your home remotely via your smartphone.

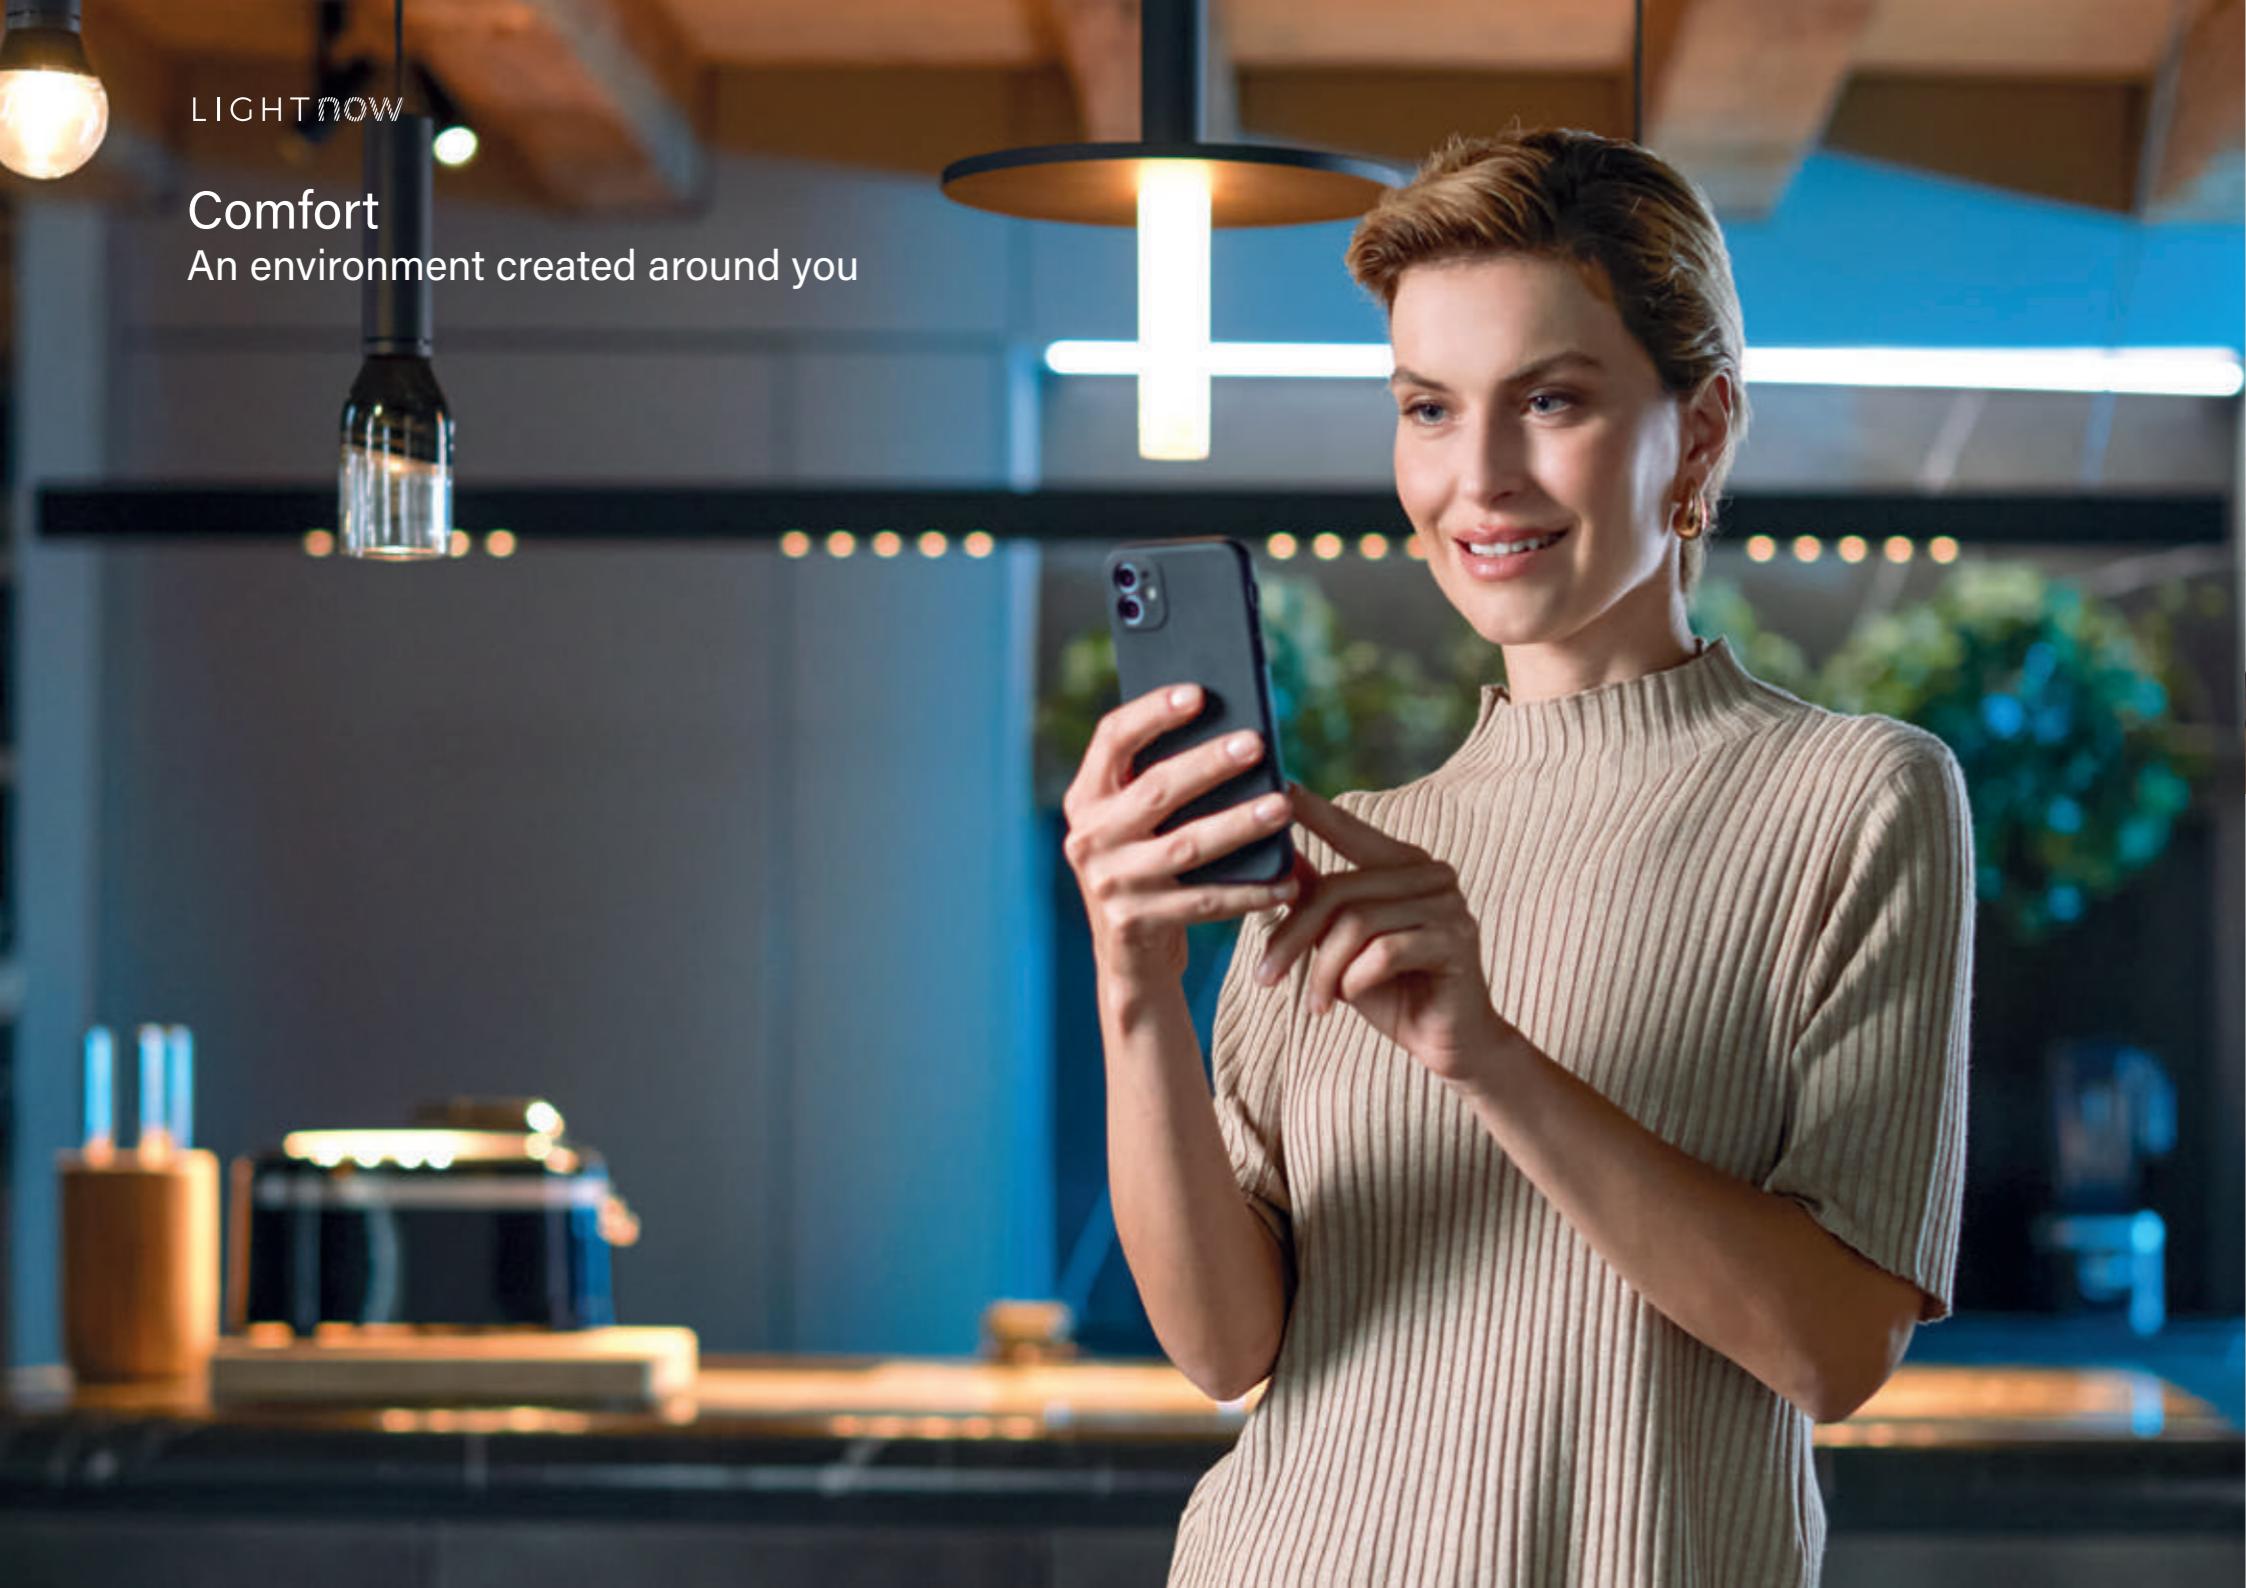

LOAD CONTROL TO AVOID BLACKOUTS

In overload condition the system automatically disconnects the less important load to avoid the intervention of the electrical meter (blackout).

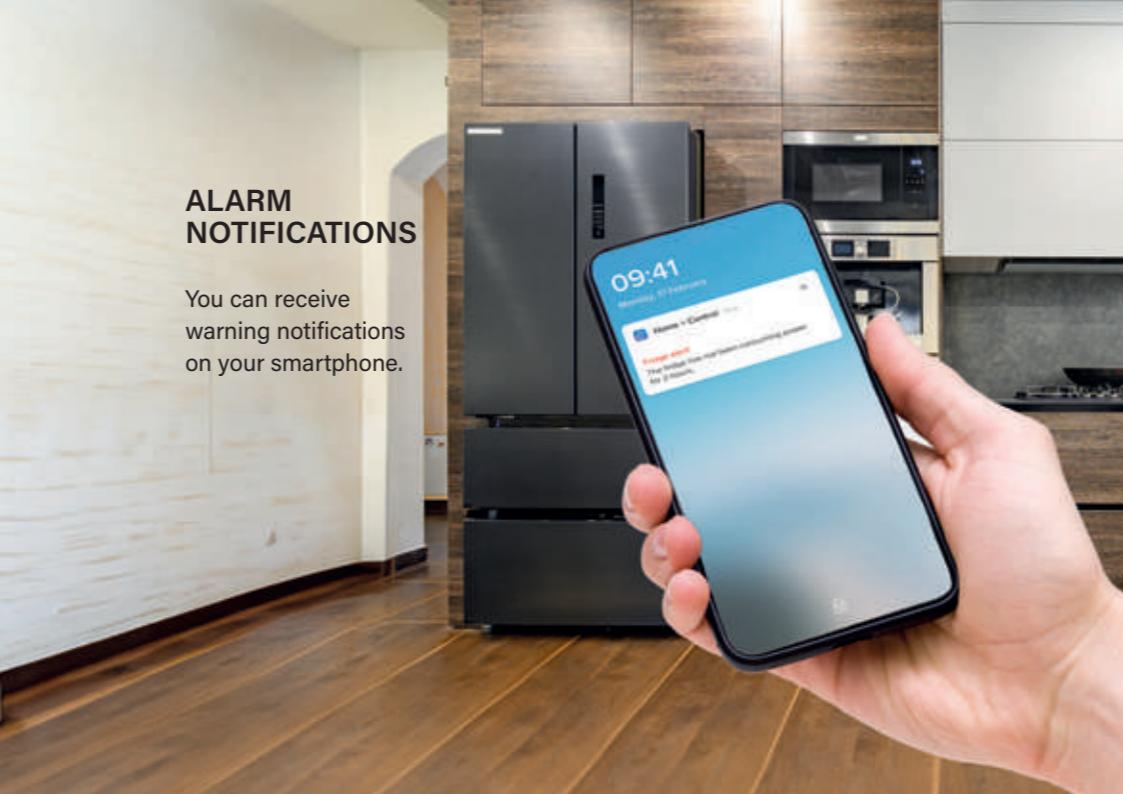

bticino

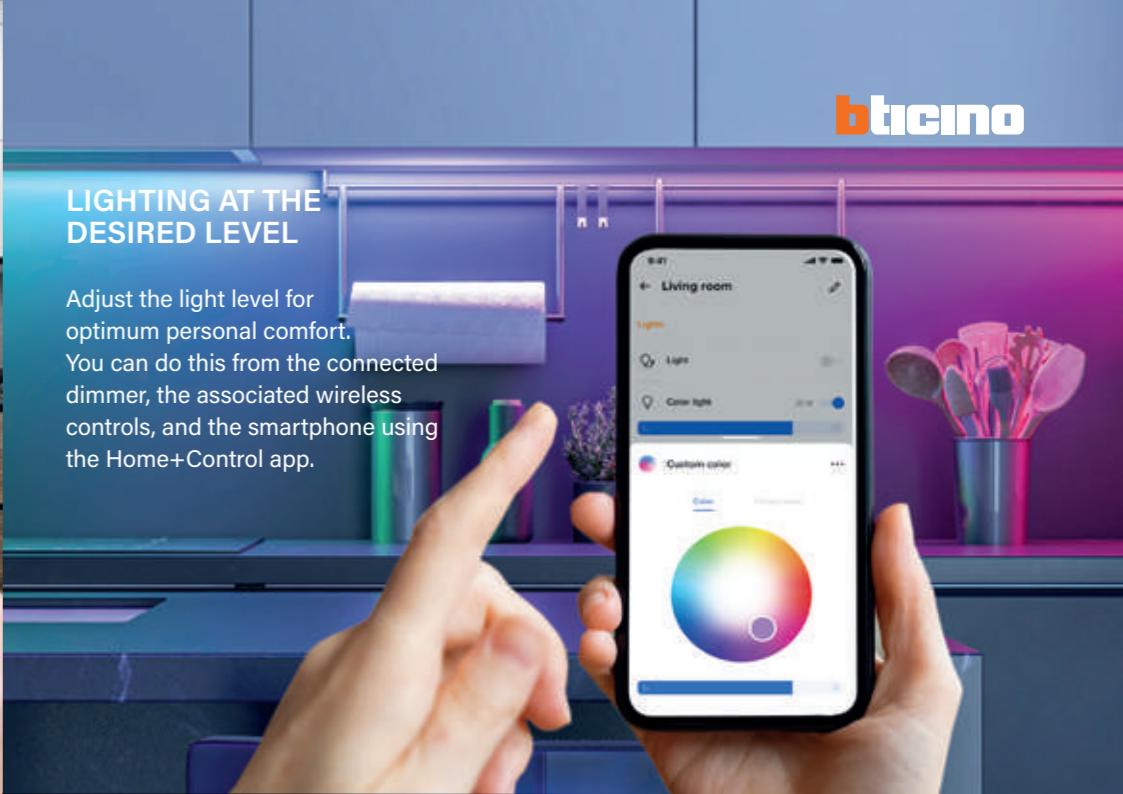

LIGHTnow

Comfort
An environment created around you

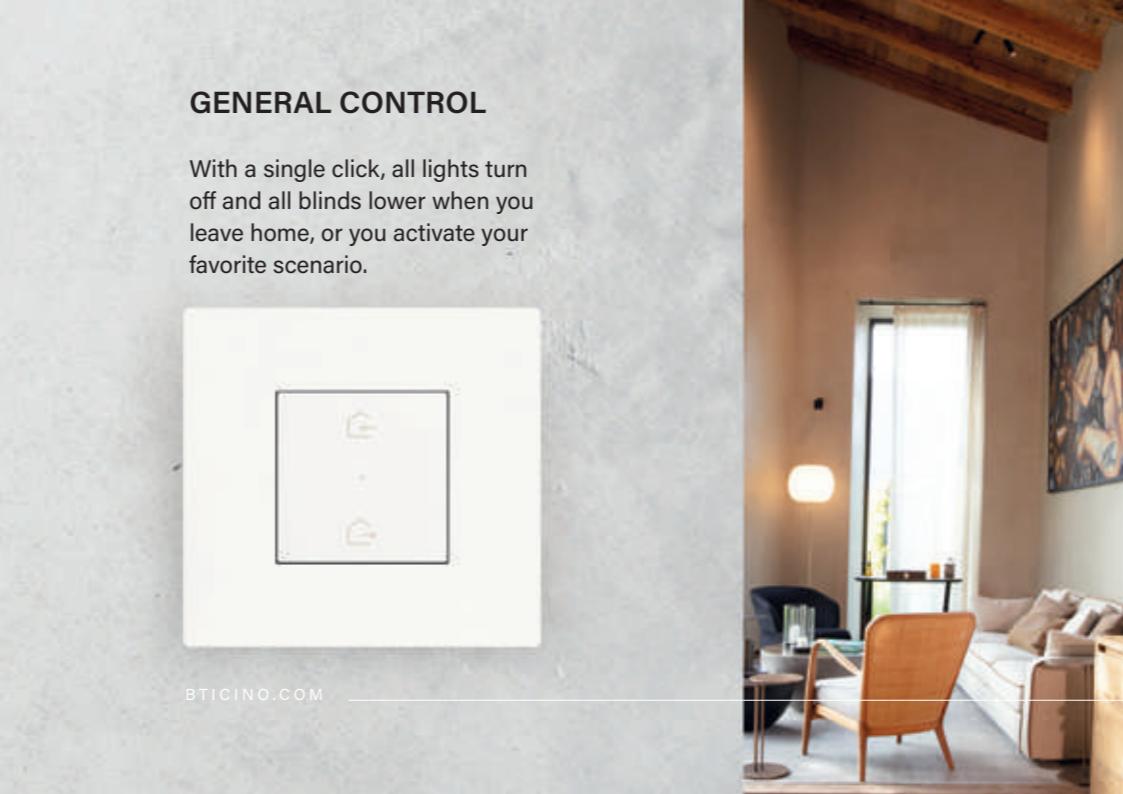

ALARM NOTIFICATIONS

You can receive warning notifications on your smartphone.

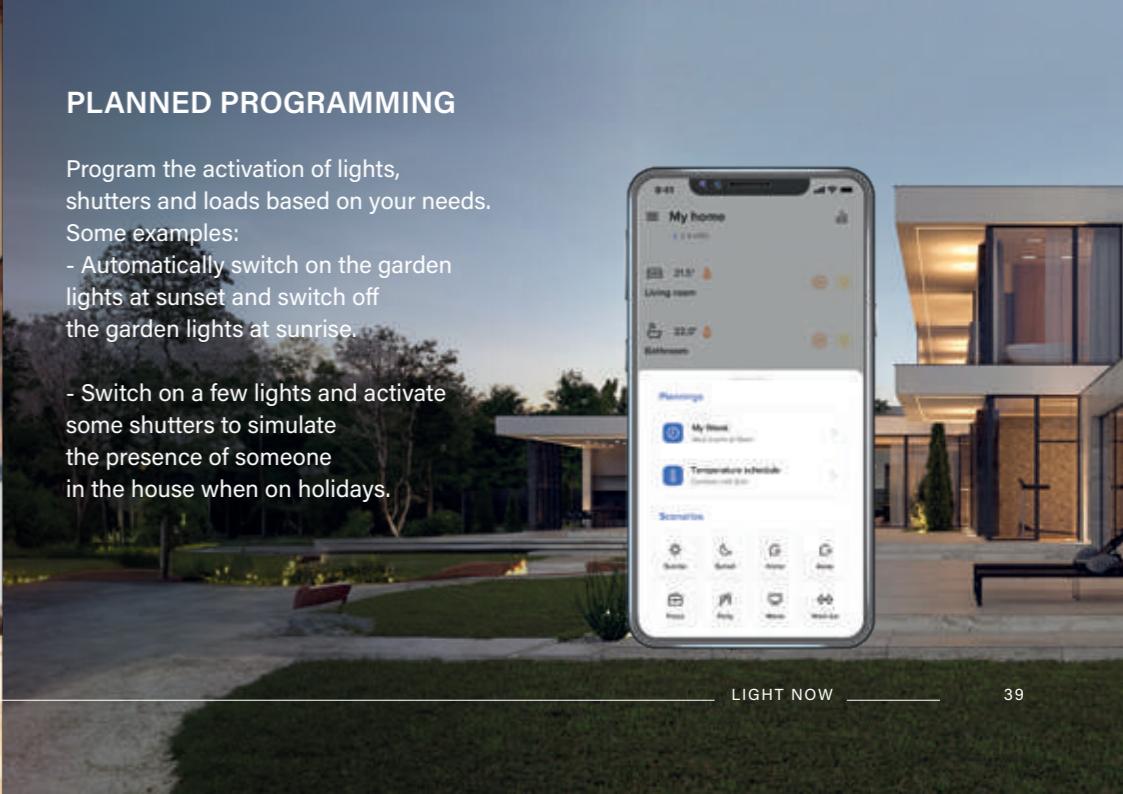

LIGHTING AT THE DESIRED LEVEL

Adjust the light level for optimum personal comfort. You can do this from the connected dimmer, the associated wireless controls, and the smartphone using the Home+ Control app.

GENERAL CONTROL

With a single click, all lights turn off and all blinds lower when you leave home, or you activate your favorite scenario.

PLANNED PROGRAMMING

Program the activation of lights, shutters and loads based on your needs.

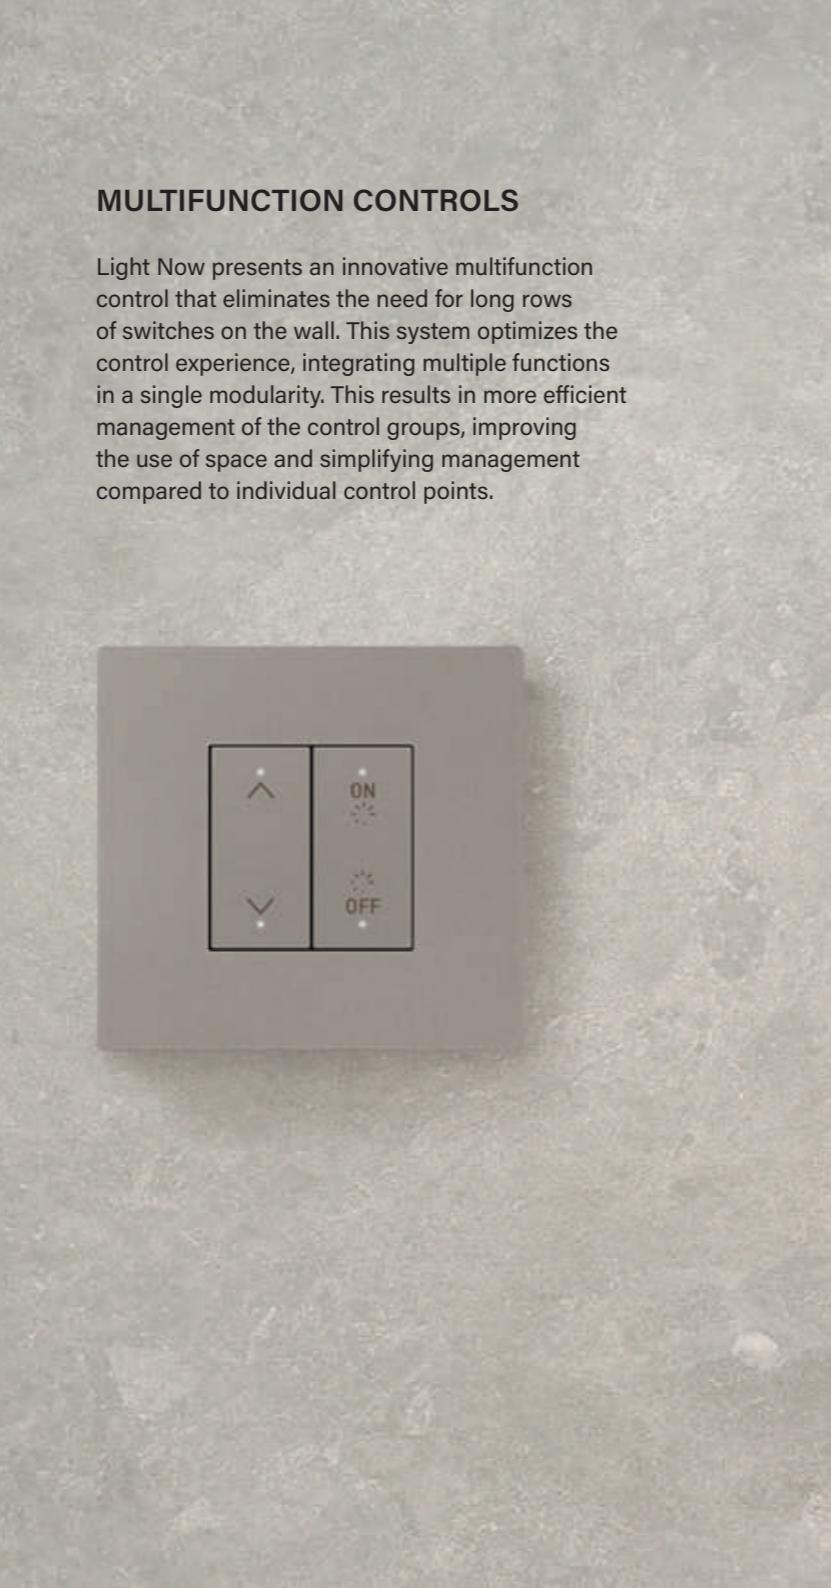

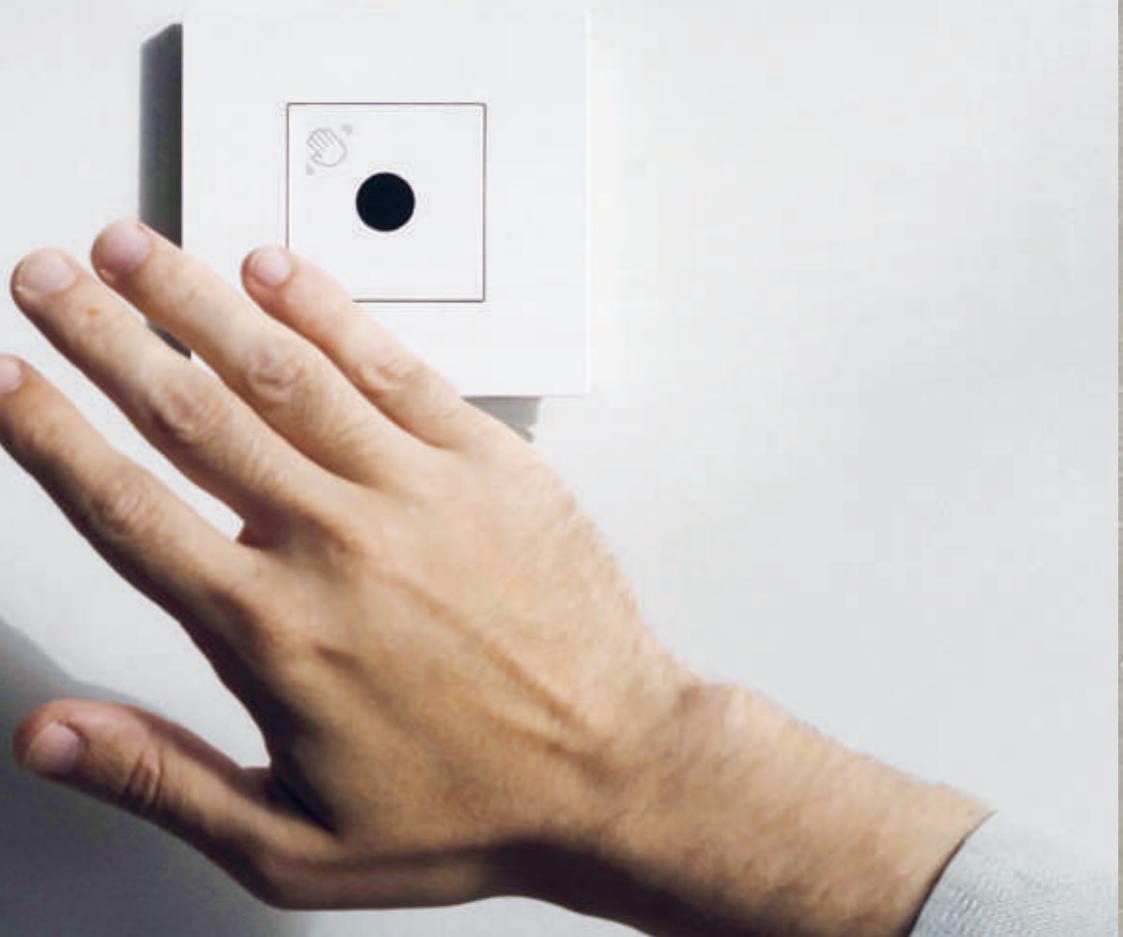

Some examples:

- Automatically switch on the garden lights at sunset and switch off the garden lights at sunrise.
- Switch on a few lights and activate some shutters to simulate the presence of someone in the house when on holidays.

Controls

Choose how to interact with your control

From axial controls to touchless, and even wireless for indoor and outdoor use, including no battery options, Light Now offers solutions for all your needs.

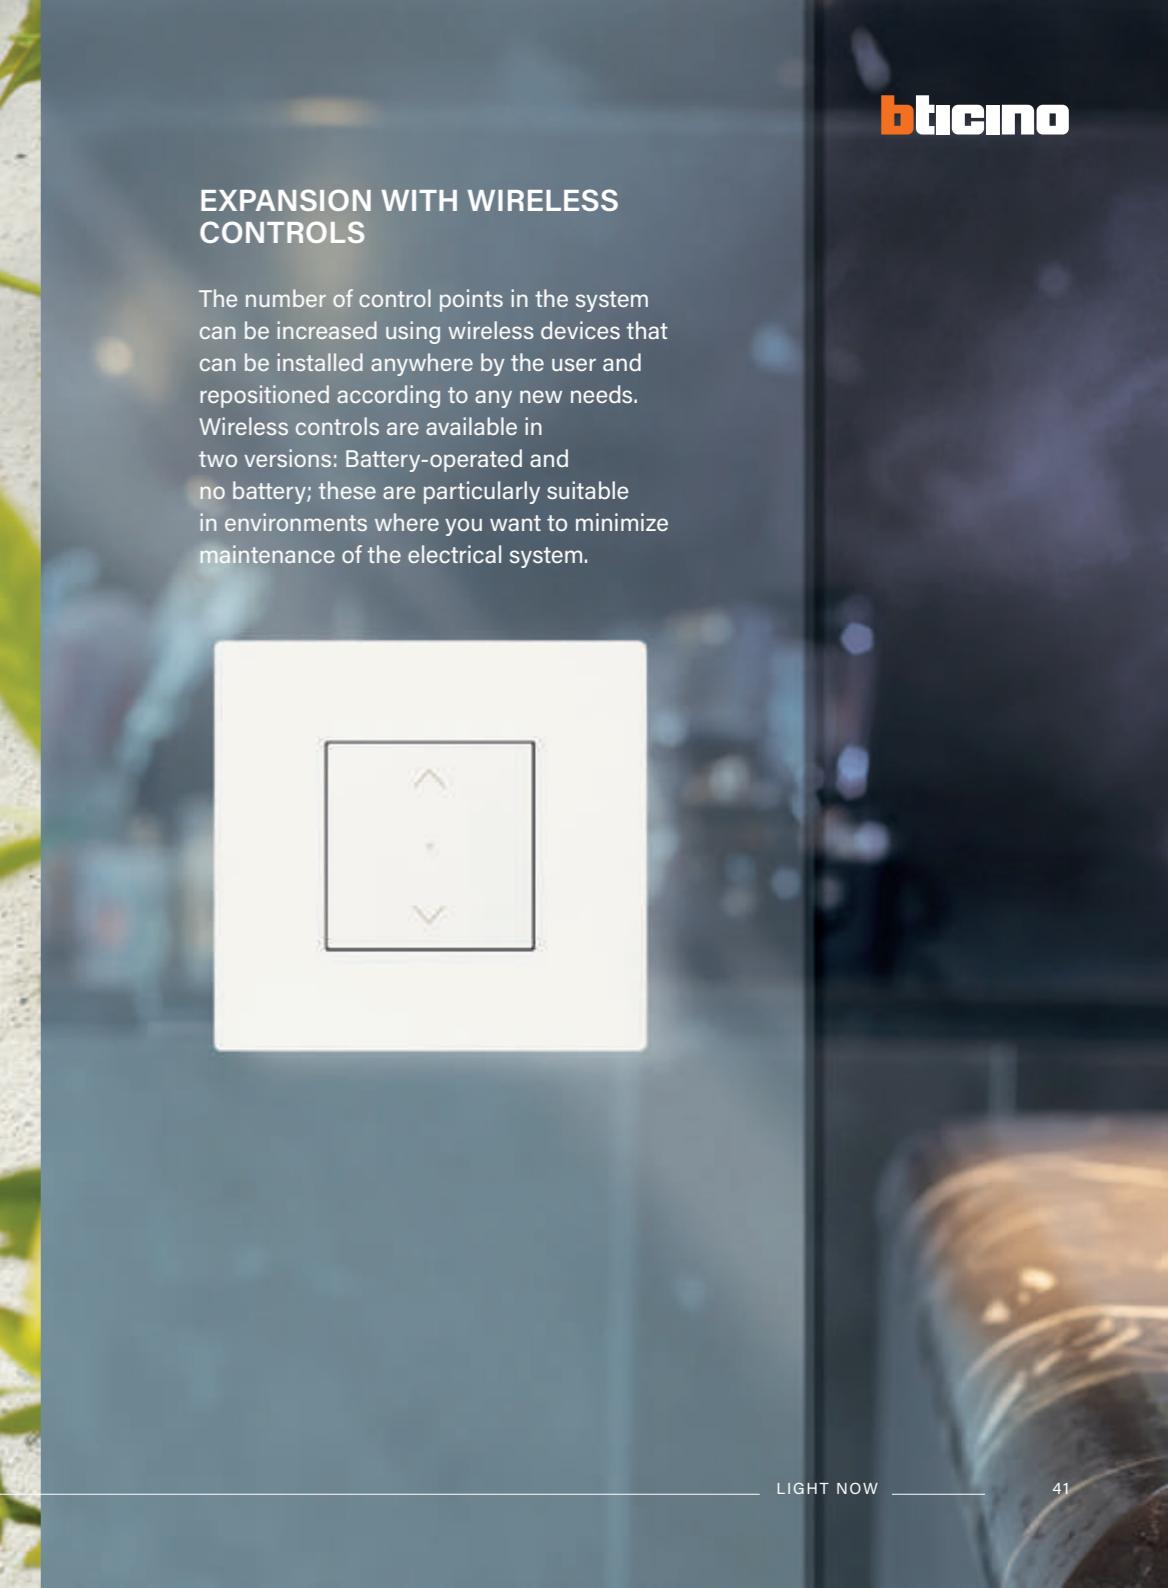

MULTIFUNCTION CONTROLS

Light Now presents an innovative multifunction control that eliminates the need for long rows of switches on the wall. This system optimizes the control experience, integrating multiple functions in a single modularity. This results in more efficient management of the control groups, improving the use of space and simplifying management compared to individual control points.

WIRELESS CONTROL FOR OUTDOOR USE

For applications where a higher protection against water, dust and external agents is required, the no battery wireless control with protection rating IP55 is available. You can add, outside the house, controls for turning on the lights or for opening the gate, without the need for wiring.

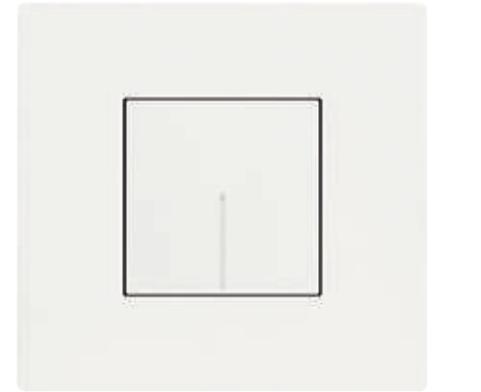

EXPANSION WITH WIRELESS CONTROLS

The number of control points in the system can be increased using wireless devices that can be installed anywhere by the user and repositioned according to any new needs. Wireless controls are available in two versions: Battery-operated and no battery; these are particularly suitable in environments where you want to minimize maintenance of the electrical system.
