

PLANAUP

NATURAL
EVOLUTION
of
PLANA

The new design of Plana Up. Contemporary and minimalistic.

The sleek design of Plana Up makes its simple shape its star feature. Compact volumes, clean-cut silhouettes and seamless surfaces define a discreet and sophisticated language. This elegant and contemporary minimalism translates into an innate versatility, capable of naturally interpreting any interior design style.
Plana Up, simply unique.

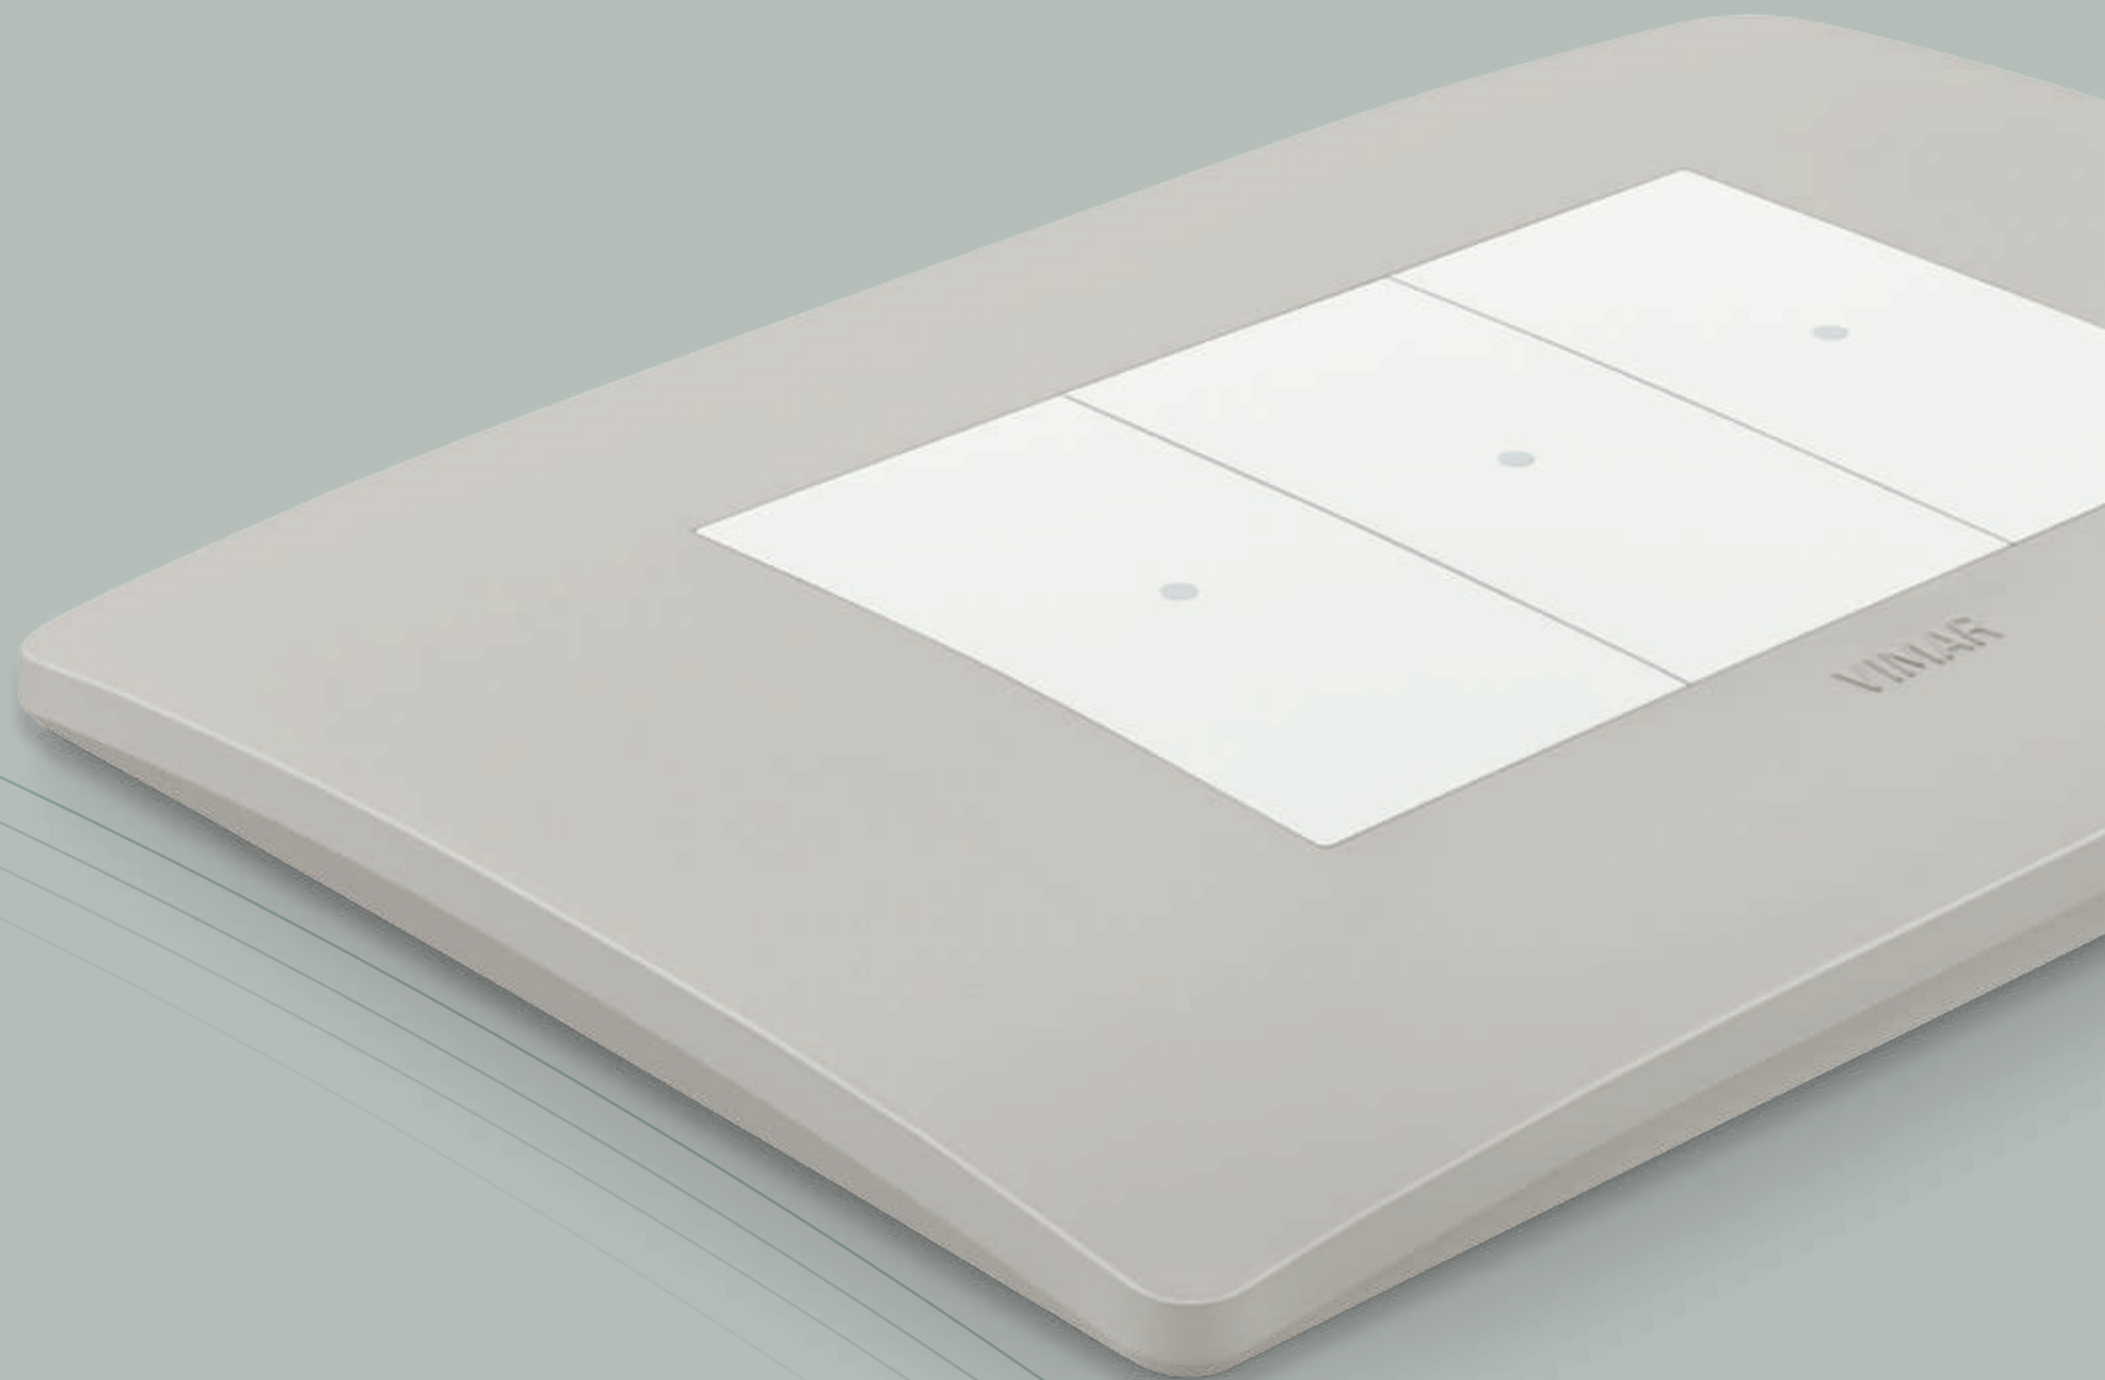

Surface continuity and minimalistic profile.

The harmony between aesthetics and functionality results in a design that naturally integrates into any setting, adapting with discretion and style.

Harmonious curves and sleek silhouettes.

Its minimalistic aesthetics, characterised by crisp geometry and balanced proportions, is intended to project a feeling of refined elegance and contemporary flair.

Plana: the most complete series on the market.
Guaranteed continuity and unwavering quality.

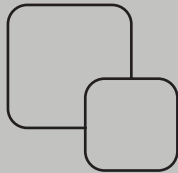

Plana, the most iconic and celebrated wiring series is getting a refresh, but it keeps the unwavering **quality**, **durability** and **reliability** that made it legendary.
Today, it stands as the most complete series on the market by number of functions, successfully merging technological innovation and new performance with modern aesthetics, ensuring functional continuity and maximum versatility, **cementing Plana's position as the enduring benchmark.**

VIMAR

New rocker control.

Discretion meets personality

The rocker control boasts a new look, enhanced by a backlit dot that defines its fresh aesthetics. Clearly visible yet never intrusive, it lights up to guide and simplify your everyday actions.

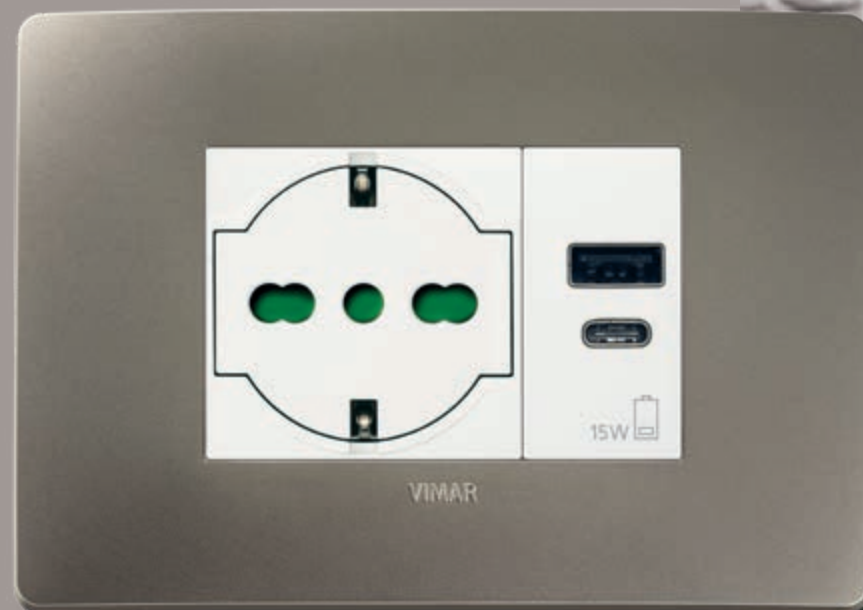

New axial control.

Compact and elegant

The axial control is enhanced by the backlighting, which defines its new aesthetics: visible yet discreet, and designed to simplify and guide everyday actions.

New flush-fitting
universal socket outlet.

Perfectly balancing shape and function

Plana Up is crafted with meticulous attention to every detail: a flush-fitting socket outlet that beautifully combines refined aesthetics with superior performance.

New push button with
integrated relay.

quid+

Quid: the simplicity of advanced control

The benefits of the Quid relay - silent, designed for centralised control, and reliable - are now integrated directly into the new Plana push button, which allows for centralised lighting control and the total OFF function. Quid is also available in a DIN rail version for easier maintenance, offering centralised control capabilities and the management of ON/OFF scenarios.

Simply
connected

Smart buildings where design integrates
with technology for easy remote control of spaces.

Smart lighting and energy management.

Connected devices

Design comes together with functionality in Plana devices, to manage lights, automations and consumption, in a smart and safe way thanks to the View App.

- > lighting management: on/off
- > dimmable light
- > centralised control

The ideal temperature at all times in every room for a sustainable lifestyle.

Remote temperature control

A range of smart thermostats and thermostatic heads to manage the temperature of every single room, also remotely via the View App.

- > remote temperature management
- > temperature programming based on habits
- > consumption monitoring
- > multi-environment control

Simple, user-friendly
function management.

**Technology and comfort for smart
hospitality**

With connected devices, any accommodation facility can become smart, simplifying both guest reception and facility management, and freeing up more time to focus on guest needs.

- > remote access management
- > in-room access management

Comfort means truly
inhabiting your spaces.

Solutions for integrated hospitality

With Vimar technology, everything becomes easier for the manager, the staff, and the guest; this includes everything from managing lights to automating blinds and roller shutters, video door entry systems and video surveillance.

- > switching lights ON/OFF
- > climate control

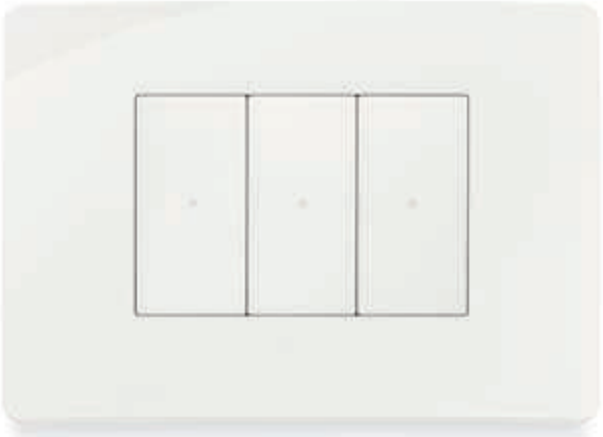

Each wall deserves
the right personality

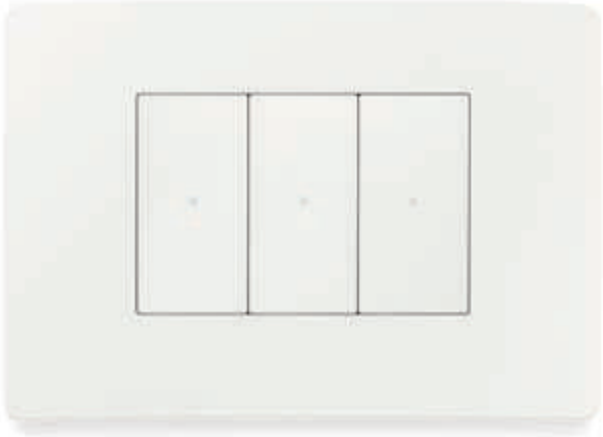

New colours for new atmospheres. Every shade is designed to evoke a precise atmosphere. Plana Up offers a colour palette that transcends trends, featuring colours - including those in the new matt finish- capable of inspiring projects and enhancing interior architecture with distinctive style solutions for environments that reflect individual personality and taste.

Total look

White

Matt white

The discreet choice of white

The total white colour seamlessly blends with any décor style. It integrates perfectly with white walls, effectively camouflaging itself to showcase your interior design choices.

The material seduction of the new matt finish

An unprecedented matt white finish with a surface that is soft and velvety to the touch, as well as resistant to scratches and wear, for sleek settings with a total look.

Neutral

Matt ivory

Matt Dolomite grey

Matt concrete grey

Decorating with neutrals

Finishes that take centre stage thanks to their versatility and elegance. Capable of creating harmonious and refined atmospheres, they naturally adapt to both contemporary and classic styles.

Matt dove grey

Matt black

Pastel

Matt aviation blue

Matt sage

Matt terracotta

Natural contexts

Delicate and contemporary, these natural pastel nuances are beautifully enhanced by the new textured matt finish. A sensory touch that brings the surfaces to life.

Stylish reflections

Modernity and refinement in a single colour choice: always on-trend, metallic finishes grant spaces a touch of contemporary exclusivity.

Suitable
for any setting

An offering of versatile, simple, and smart technological solutions designed for managing homes, offices, hotels, and healthcare facilities with the utmost efficiency.

Residential

The Plana range offers solutions for both interior and exterior areas of the home, creating smart and welcoming living spaces.

Hospitality

From large hotels to B&Bs: Plana enables seamless management of accommodation facilities with a single, efficient, and comfortable system, using innovative devices to control access, climate, energy, and all room functions.

Service industry

Customised scenarios and high-performance socket outlets: Plana offers a series of devices and systems for efficient, rapid and centralised management of all working areas.

Healthcare

From clinics to hospitals: scalable and secure solutions for any healthcare facility.

Plana guarantees efficient call devices to support staff and ensure patient peace of mind. Also available in the Antibacterial version.

ANTIBACTERIAL

Plana reaches anywhere.

In the garden, in the garage, under a porch, or in the cellar, Plana guarantees protected and secure solutions thanks to its complete range of waterproof surface mounting enclosures with IP40, IP55, and IP66 protection degrees.

Compact technology and maximum practicality

In offices, meeting rooms, shops, and all public spaces, our floor mount turrets for both floating and screed floors can house a versatile electrical distribution network. With Plana devices, you can combine functionality and impeccable styling in a single solution.

Energy is always within reach

The table mounting boxes offer a practical and discreet power supply point directly on the desk. They integrate harmoniously with the workspace, ensuring neatness and convenience in every operational setting.

The most comprehensive range of solutions

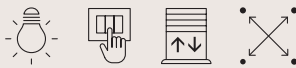

Smart and simple technological solutions that are easy to update and expand for total control of the home and building.

Advanced traditional solutions.

quid+

The innovative Quid devices allow for simple, centralised control of lights and roller shutters.
The system supports advanced functions on wired systems, offering the ability to implement a centralised power-off control to switch off all lights with a single action. It also allows you to automate blinds or roller shutters by enabling group control and saving their favourite position.
Smart solutions designed to understand the surrounding occupants' habits.

Smart solutions.

View Wireless

The View Wireless system makes it possible to manage the temperature, lighting, roller shutters or motorised blinds and to control accesses, and it does so in a simple and safe way.
It can also be used to monitor energy consumption, manage loads and set scenarios with the utmost simplicity using connected controls, via the View App or directly by voice.

Home automation solutions.

By-me Plus

Complete and connected functions, integrated and expandable, controllable via App and voice-operated.

The By-me Plus home automation system consists of a range of intercommunicating devices designed to improve the comfort, energy efficiency and security of everyday life; the modular design of the line-up and the depth of the range accommodate the functional requirements of residential customers and those of small service and hospitality industries, for both new builds and refurbishments.

Building automation solutions.

Well-contact Plus

Complete automation with integrated functions and centralised monitoring. Flexible, interoperable, modular and safe, Well-contact Plus is the system developed on the KNX standard to provide smart and secure building management.

Designed for application in the hotel, service and residential sectors, it is designed to create centralised systems that ensure the integration, supervision and total control of lighting, air conditioning, security, energy and accesses. The system ensures simplicity of use and an optimised user experience, easily adapting to the needs of any environment.

International solutions.

English standard socket outlet with USB A+C

German standard socket outlet

American standard socket outlet with USB C+C

Australian standard socket outlet

French standard socket outlet with USB C

Swiss standard socket outlet

Plana speaks an international language

Available in all major international standards, the socket outlets adapt to any need through their diverse types. This versatility guarantees safe, reliable connections no matter where you are in the world.

Plana quality and commitment to sustainability.

100%
of packaging is fully recyclable.

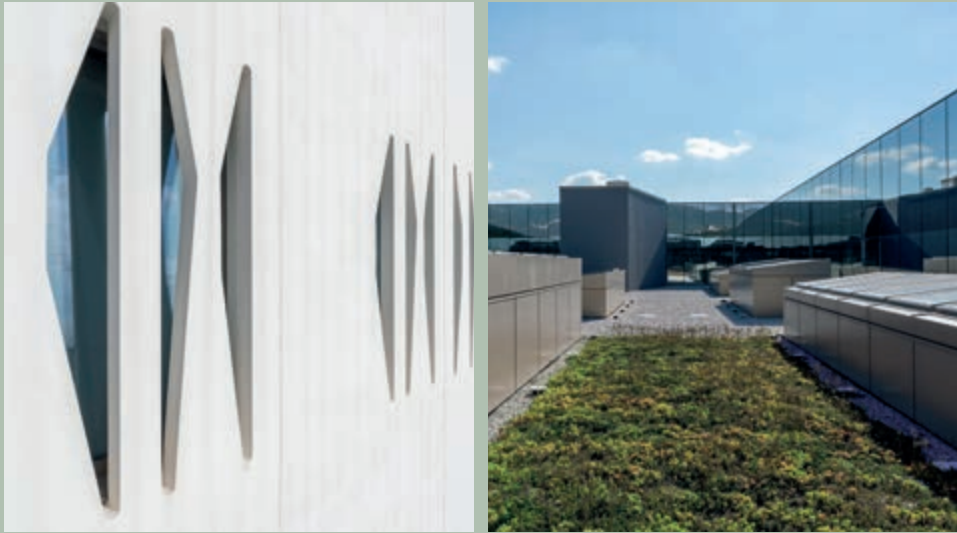

Vimar packaging reflects the principles of sustainability and innovation.

Product cases, enclosures and boxes are made of recycled cardboard or card, printed with water-based ink and make exclusive use of eco-sustainable glues. The paper used is FSC certified, which guarantees it is sourced from responsibly managed forests.

Our commitment to the future. We have chosen Positive Energy.

We implement a circular economy model that drives our design concepts: with the work we do, with our research and our designs, we invest in the urgent challenges to regenerate the environment.

In our production plants, too, we have made design choices in which sustainability, architectural value and occupational comfort are expressed to the full.

Products assessed according to the LCA approach

We assess the environmental performance of Vimar's high-turnover products according to the LCA (Life Cycle Assessment) approach, with respect to the international reference standards ISO 14040 and 14044. The process is part of the Environmental Product Declaration (EPD).

EPD-PEP Ecopassport certifications are available for all high-turnover products in the Linea, Eikon, Arké and Plana series and junction boxes; these are flagged with the relevant mark on every product sheet on www.vimar.com
