ARKÉ

 **VIMAR**
energia positiva

There are objects considered as a time reference for they perfectly reflect all archetypes of a certain era. That's exactly what Arké represents: a concentrated form of design and technology progress. A strong innovative personality characterized by simplicity and a charismatic nature. The Vimar range is dedicated to those who enjoy living in a timeless present moment that lasts a lifetime.

ARKÉ. TRENDY IN STYLE,

CONTEMPORARY IN TIME.

Two designs inspired by the principle of simplicity: the cover plates are stripped of all unnecessary decoration and define a new model of energy.

Arké is Classic: rigorous and linear, available with between 1 and 21 modules, also in the **British Standard** and **multi-module** versions. Or **Round:** soft and sinuous, with between 1 and 21 modules.

DIFFERENT GEOMETRIES AND UNIVERSAL,

VERSATILE AND MODULAR STYLING.

Buttons in white, anthracite grey or Metal: a perfect total look.

Arké exudes the great energy of modernity with perfect poise thanks also to the colours of the buttons and controls. Available in white, anthracite grey or Metal, they complement with any surroundings, enhancing the style and offering the utmost freedom.

Materials and finishes. To express all-Italian creativity beautifully.

Materials selected to stand the test of time, innovative production processes and typically Italian attention to finishes. A perfect combination that offers a product of outstanding style designed to enhance every space with its most unique expression.

Metal-Elite and Metal-Color: the marvels of metal.

Painted zamak and PVD-coated zamak:
two metal types, ample strength, numerous shades
and different textures chosen to highlight the
contemporary style of this product range.

Alu-Tech: aluminium.

Natural, lava, dark bronze: there are three different shades of di Alu-Tech available. Selected to stand the test of time, they are the result of innovative production processes and of a typically Made in Italy focus on finishes. Extensive durability and a variety of textures that emphasise the contemporary appeal of this line.

Solid wood: an iconic material that is always contemporary.

Cover plates with a strong material quality, conveyed through the warm, harmonious appeal of solid wood. And selected based on details, particular finishes, brightness and the natural qualities of a timeless material.

Reflex-Plus eclectic and versatile technopolymer

A shiny material with a special
frosted look in various hues:
from the full-bodied caramel and
ultramarine to the lighter shades of
sage and smoky grey.

Tecno-Basic technopolymer

A simple, hard-wearing material which Arké has paired with stylish and conservative colours, such as black and white, for pairings that do not follow fashion fads.

Color-Tech varnished technopolymer

A technopolymer with a special varnished treatment that affords a charming metal effect. To ensure the finishes gleam and shine with an elegant liveliness, enhancing the high-tech style of matt silver and the modernity of Metal.

IDENTITY IS
COORDINATED DOWN TO
THE SMALLEST DETAIL.

Arké cover plates can also be customised with logos provided by the client. A possibility that further enhances the identity of a specific setting.

VISUAL IMMEDIACY
WITH SYMBOLS ON
BUTTONS.

Once you've chosen the symbols you want from our extensive gallery of pictograms representing the most widely used functions, we can reproduce them with total precision, using laser technology.

A PERFECTLY
COORDINATED
USER EXPERIENCE.

Offering a perfectly matching style encompassing RGB LEDs into the user interface that let you choose the backlighting colour.

Customisable.

To enhance the identity of every context. To enhance the value of a building's identity, in line with the latest interior design trends, the cover plates are available in an array of colours and can be bespoke engraved with a specific logo, while the buttons and controls can be customized according to the chosen function.

OVER
200 COLOURS.

Metal cover plates can be chosen in a colour that best complements the style of interior design. This gamut of alternatives will offer the latest styling trends, and brings maximum value and impact to the architectural project.

Versatile solutions

Our solutions respect the identity of every setting.

You can smartly, simply and constantly expand your ecosystem for a total home and building control.

Arkè fits perfectly into your project.

From small to large buildings:

FUNCTIONS

We take care of your projects with simplicity.

Arkè range has versatile technological solutions from standard installation to advanced integration smart systems.

Basic functions for lights and automation, highly customisable

Centralised and timed basic functions

Programmable functions, managed remotely and with voice

Professional automation integration and scalable functions

ADVANCED ELECTRICAL INSTALLATION

quid+

“That little something more”, dedicated to standard installation. Innovative solution to centralise the control of lights and roller shutters. Ideal at the doorway, on the bedhead of a hotel, in commercial areas, homes and working places.

QUID FOR LIGHTS – INNOVATIVE RELAY.

SILENT RELAY with patented magnetic technology.

CENTRAL CONTROL OFF - only 1-wire.

ENERGY SAVING: no consumption when it is off, as it is not electronic.

The presence of a warning light reveals if lights are still on.

QUID FOR ROLLER SHUTTERS - INNOVATIVE ELECTRONIC SWITCH.

CENTRALISED CONTROL - with 2-wires

RELIABLE AND SAFE - with disconnection of the load at the end

COMFORT - it memorises the favourite position of curtains and roller shutters

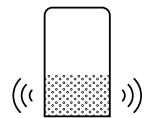

CONNECTED SMART INSTALLATION

View Wireless devices can manage lighting, roller shutters or motorised curtains, control energy consumption and manage scenarios, with the utmost simplicity using classic 1-way switches, via app or directly by voice.

Update, extend or replace your wiring system, you have the chance to make your home match, integrable over time. It is also ideal for renovations or to boost the functions of an existing system, and it is a useful means of support for the elderly and people with restricted mobility.

VOCAL CONTROL OR VIA APP
LOCALLY OR REMOTELY

Up to 64 devices

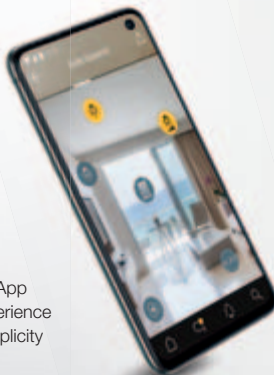

INTEGRATED AUTOMATION SYSTEMS

By-me Plus is one of the main systems of the VIEW platform.

It enables the user to control and perform the integrated management of the lighting, curtains and roller shutters, temperature and energy control of the building and the multi-room sound system.

- EASY INSTALLATION AND ADVANCED TECHNOLOGY
- IMPROVED ENERGY EFFICIENCY AND ENERGY MANAGEMENT
- LOAD MANAGEMENT
- TEMPERATURE CONTROL
- INTEGRATION WITH SAFETY, SECURITY AND AUTOMATION

VIEW App.

The unique VIEW App
a unique user experience
in the name of simplicity

Each building is its own blank canvas.

Design to increase performance, comfort, energy saving, creating smarter building and increasing their value.

This Vimar KNX solution represents a **higher level of flexibility and scalability.**

The KNX devices for building automation can be operated together with all the products of companies that comply with the standard, ensuring a single integrated system that is connected to the world of the IoT via specific gateways or IP web-servers.

- EASY INSTALLATION AND ADVANCED TECHNOLOGY
- FLEXIBILITY & SCALABILITY
- WIDE RANGE OF PRODUCTS & FUNCTIONS

At your fingertips everywhere and always.

An endless array of customizable solutions utilizing every aspect of space, design and automation requirements. Network enabled solutions which are easily linked to smartphone or tablet. To manage everything, wherever you may be. Total comfort from all perspectives, with matching styling.

LIGHT DECORATES AND FURNISHES SETTINGS.

You can adjust the intensity of lighting to suit your needs, or activate lighting effects with RGB colours, simply and immediately.

THE NETWORK SPREADS EVERYWHERE.

The access point is the simplest way to spread your Internet network and connectivity throughout your home, even where the signal of your Wi-Fi router is weakest or inaccessible.

COMFORT

YOUR FAVOURITE TUNES IN EVERY ROOM.

Simply activate Bluetooth on your smartphone, and play music in every environment with maximum power and quality.

LIGHT FOLLOWS YOU EVERYWHERE.

A removable hand lamp provides portable emergency light and immediately switches on in the event of a power failure.

It takes just moments to create the perfect atmosphere.

It's easy and straightforward to recall your favourite environmental conditions thanks to functions which allow you to manage lighting, sound systems, curtains or roller shutters in a fully coordinated manner.

How to get maximum efficiency without compromise.

Optimising consumption without compromise. Thanks to its smart technology, Arké guarantees superior levels of climate comfort, energy supervision of spaces, perfect load management and photovoltaic energy distribution. To make sure you consume less and live better.

INTELLIGENT ENERGY MANAGEMENT.

The energy profile is monitored constantly, as are water and gas consumptions, individual appliance loads and the energy produced by any photovoltaic system.

THE TEMPERATURE IS ALWAYS AS YOU LIKE IT.

Thermostats and timer-thermostats for all types of temperature control systems allow optimal climate management. They also indicate when the comfort temperature has been exceeded, thus encouraging greater energy awareness.

LIGHT ONLY WHEN YOU NEED IT.

Presence detectors switch lights on and off only when someone passes, avoiding energy waste and creating pathways lit step by step.

Living in a protected world.

Protected against burglars, under surveillance by cameras, monitored in all accesses and immune to gas leaks or flooding.

Thanks to outstanding products and technologies, your environments are always safe and secure and the occupants of your home can live with full peace of mind.

ALL MOVEMENTS ARE ACCURATELY DETECTED.

Detectors positioned at strategic points throughout the home efficiently and reliably identify the presence of any unauthorised persons in the building.

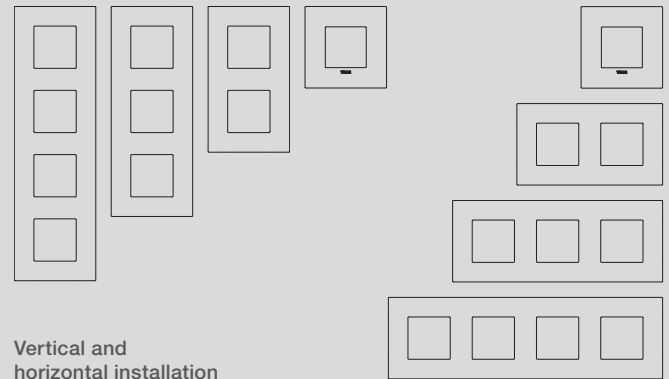

MONITORED, SECURE SPACES AND HIGH-RESOLUTION COMMUNICATION.

Stand-alone and expandable with a wide range of devices, By-alarm is an efficient burglar alarm system that can be integrated with the By-me home automation system, offering maximum protection. Elegantly designed touch screens provide traditional video entryphone functions and can also be used to manage all functions throughout the building.

International potential, Made in Italy.

To accommodate the various usage requirements in various different countries, Arké offers an extensive range of devices in the most popular international standards and it stands out for its ample versatility, both modular and installation-wise, to guarantee bespoke systems, always.

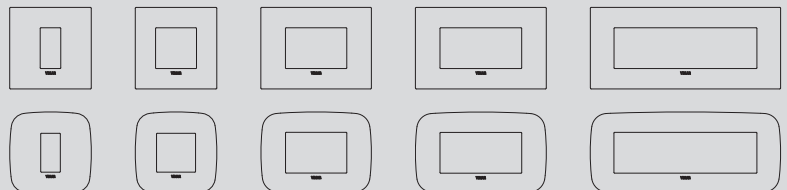

MULTI-MODULE CLASSIC COVER PLATES

BRITISH STANDARD CLASSIC COVER PLATES

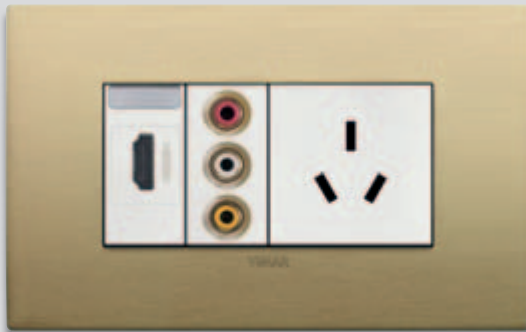

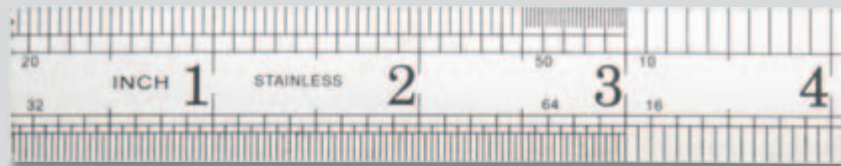

CLASSIC AND ROUND COVER PLATES IN OTHER STANDARDS

Several international standards.

Socket outlets with Italian, British, French, German, American, Chinese standard, to design and manage energy in complete safety according to individual international specifications.
